Circulation Research

SUBJECT INDEX

VOLUME XXIV

JANUARY-JUNE, 1969

A

- Acetylcholine**
 - autoregulation and vascular responsiveness, 599
 - serial studies in acute respiratory failure, 51
- Acetylcholinesterase (AChE)**
 - localization at a cholinergic vasodilator nerve-arterial smooth muscle synapse, 61
- Acetylstrophanthidin**
 - effect of contractility on left ventricular response to vagus nerve stimulation in dogs, 303
- Acid phosphatase**
 - lysosomal enzymes in myocardial infarction, 851
- Acidemia**
 - preservation of ventricular function by adrenergic influences during metabolic acidosis in the cat, 373
- Actin**
 - binding characteristics of myosin and, 657
- Action potentials**
 - development in prenatal rat heart, 19
 - electrophysiological actions of lidocaine on canine ventricular muscle and Purkinje fibers, 639
 - halothane and cardiac fibers, 745
 - influence of glucose on action potential of guinea-pig papillary muscle, 939
 - inotropic effects of electric currents, 409
 - interaction of transmembrane potentials in canine Purkinje fibers and at Purkinje fiber-muscle junctions, 361
- Activation wave front**
 - electrical potential distribution, 857
- Adenosine**
 - autoregulation and vascular responsiveness, 599
- Adenosine triphosphate (ATP)**
 - effect on binding characteristics of myosin and actin, 657
 - effect on metabolic state of the excised hypothermic dog heart, 617
 - energy utilization in heart failure, 313
 - glucose and action potential of cardiac muscle, 939
- Adrenal cortex**
 - aldosterone secretion during hemorrhage, 893
- Adrenal cortical steroids**
 - hydrocortisone potentiation, 383
- Adrenergic-cholinergic interaction**
 - effect of contractility on left ventricular response to vagus nerve stimulation in dogs, 303
- Adrenergic influences**
 - preservation of ventricular function during metabolic acidosis in the cat, 373
- Adrenergic nerves**
 - norepinephrine in failing bovine heart, 71
- Aldosterone**
 - biphasic stimulation of aldosterone secretion during hemorrhage in dogs, 893
- Alloxan**
 - pulmonary blood flow distribution in edema, 807
 - sodium recovery in pulmonary edema, 815
- Amines**
 - hydrocortisone potentiation, 383

- sympathomimetic
 - glucose and action potential of cardiac muscle, 939
- Aminophylline**
 - effect of contractility on left ventricular response to vagus nerve stimulation in dogs, 303
 - glucose and action potential of cardiac muscle, 939
- Anatomy**
 - anatomical and ultrastructural study of the electrophysiological A-V node of the rabbit, 457
- Anesthesia**
 - halothane, neural integration in arterial hypoxia, 757
- Angiotensin**
 - autoregulation and vascular responsiveness, 599
 - reflex regulation of arterial pressure during sleep, 109
- Animals**
 - calves
 - norepinephrine in failing heart, 71
 - cats
 - force velocity relationship, studied by isotonic and quick-release techniques, 821
 - hemodynamic patterns during sleep, 923
 - preservation of ventricular function by adrenergic influences during metabolic acidosis, 373
 - sympathetic ganglia and the defense reaction, 843
 - utilization of high-energy phosphates in experimental heart failure, 313
 - dogs
 - aldosterone secretion during hemorrhage, 893
 - antiarrhythmic agents, 835
 - bilateral carotid sinus control of ventricle, 321
 - binding characteristics of myosin and actin, 657
 - cardiovascular performance of Alaska sled dogs during exercise, 33
 - cutaneous venoconstrictor response to local cooling in the dog, 607
 - effect of ATP on excised hypothermic heart, 617
 - effect of left ventricular contractility response to vagus nerve stimulation, 303
 - effects of hypothermia and pronethalol on ionic correlates of ouabain arrhythmias, 43
 - elastic symmetry of arterial segments, 1
 - electrical potential distribution, 857
 - electrophysiological actions of lidocaine on ventricular muscle and Purkinje fibers, 639
 - hemodynamics of neurogenic hypertension, 911
 - influence of sympathetic nerve stimulation on right ventricular pressure, 397
 - interaction of transmembrane potentials in canine Purkinje fibers and at Purkinje fiber-muscle junctions, 361
 - lactones and calcium metabolism, 793
 - left ventricular fiber angle, 339
 - luminal coronary collateral circulation, 735
 - lysosomal enzymes in myocardial infarction, 851
 - mechanical stress and intimal change, 93

- myocardial oxygen consumption and, 725
- oxygen and myocardial blood flow in hemorrhagic shock, 901
- pulmonary blood flow distribution in edema, 807
- relative roles of sympathetic and parasympathetic nervous systems in carotid sinus reflex, 447
- right and left ventricular cell and sarcomere lengths after banding the pulmonary artery, 705
- sodium recovery in pulmonary edema, 815
- sympathetic control of femoral artery, 349
- vasopressin-induced bradycardia, 787
- guinea pig
 - acetylcholinesterase at a cholinergic vasodilator nerve-arterial smooth muscle synapse, 61
 - influence of glucose on action potential of papillary muscle, 939
- mice
 - red cell velocity in cerebral microcirculation, 887
- monkeys
 - endotoxin-induced regional circulatory changes in unanesthetized monkey, 777
- rabbits
 - anatomical and ultrastructural study of the electrophysiological A-V node, 457
 - autonomic effects during severe arterial hypoxia in unanesthetized rabbit, 671
 - binding characteristics of myosin and actin, 657
 - effect of ouabain on energy output of cardiac muscle, 951
 - halothane and cardiac fibers, 745
 - hydrocortisone potentiation, 383
 - neural integration in arterial hypoxia, 757
- rats
 - calcium exchange in rat cardiac cells, 589
 - development of action potential of the rat heart, 19
 - increased rate of RNA synthesis in experimental cardiac hypertrophy, 9
 - multigenic origin of membranous septal defects, 629
 - norepinephrine in hypertension, 85
- sheep
 - halothane and cardiac fibers, 745
- toads
 - healing-over of myocardial cells, 475
- Anoxia**
 - glucose and action potential of cardiac muscle, 939
- Antiarrhythmic agents**
 - qualitative distinction between beta-receptor-blocking and local anesthetic actions, 835
- Aorta**
 - elastic symmetry of arterial segments, 1
 - experimental constriction
 - increased rate of RNA synthesis in experimental cardiac hypertrophy, 9
 - hydrocortisone potentiation of responses to epinephrine and norepinephrine, 383
 - thoracic
 - histological and chemical responses of vascular interface to acutely induced mechanical stress in aorta of the dog, 93
- Arrhythmias**
 - antiarrhythmic agents, 835
 - effects of halothane on single atrial, ventricular, and Purkinje fibers, 745
 - effects of hypothermia and pronethalol on ionic correlates of ouabain arrhythmias in dogs, 43
 - electrophysiological actions of lidocaine on canine ventricular muscle and Purkinje fibers, 639
- Arteries**
 - elastic symmetry of arterial segments in dogs, 1
 - femoral, sympathetic control of, 349
 - hypoxia
 - autonomic effects during severe arterial hypoxia in unanesthetized rabbit, 671
 - neural integration in, 757
 - pressure, reflex regulation during sleep, 109
 - uterine, acetylcholinesterase at a cholinergic vasodilator nerve-arterial smooth muscle synapse, 61
 - walls
 - incorporation of oleic acid into lipid by foam cells in atherosclerotic lesions, 123
- Arterioluminal and arteriosinusoidal vessels**
 - luminal coronary collateral circulation, 735
- Atheroma**
 - incorporation of oleic acid into lipid by foam cells in atherosclerotic lesions, 123
- Atherosclerosis**
 - histological and chemical responses of vascular interface to acutely induced mechanical stress in aorta of the dog, 93
 - lesions
 - incorporation of oleic acid into lipid by foam cells in, 123
- ATP. See Adenosine triphosphate**
- ATPase activity**
 - effect of cardiotonic lactones on calcium metabolism of dog cardiac microsomes, 793
- Atria**
 - effects of halothane on fibers, 745
 - electrical potential distribution surrounding atria during depolarization and repolarization in the dog, 857
- Atrial artery**
 - left anterior
 - luminal coronary collateral circulation, 735
- Atrioventricular conduction**
 - anatomical and ultrastructural study of the electrophysiological A-V node of the rabbit, 457
 - carotid sinus reflex, 447
- Atropine**
 - sympathetic ganglia and the defense reaction in the cat, 843
- Autonomic nervous system. See Nervous system, autonomic**
- Autonomic transmission**
 - acetylcholinesterase at a cholinergic vasodilator nerve-arterial smooth muscle synapse, 61
 - during severe arterial hypoxia in the unanesthetized rabbit, 671
- Autoregulation**
 - and vascular responsiveness in dogs, 599

B

- Baroreceptor reflexes**
 - bilateral carotid sinus control of ventricular performance in the dog, 321
 - hemodynamics of sleep, 923
 - reflex regulation of arterial pressure during sleep, 109
- Baroreceptors**
 - autonomic effects during severe arterial hypoxia in unanesthetized rabbit, 671
 - neural integration in arterial hypoxia, 757
- Beta-receptor blockade**
 - preservation of ventricular function by adrenergic influences during metabolic acidosis in the cat, 373

Beta-receptor stimulation

- dopamine and coronary hemodynamics, 699
- qualitative distinction between the beta-receptor-blocking and local anesthetic actions of antiarrhythmic agents, 835

Binding

- norepinephrine in hypertensive rat, 85

Biochemistry

- correlates of cardiac hypertrophy, increased rate of RNA synthesis in experimental cardiac hypertrophy, 9
- energy utilization in heart failure, 313

Blood flow

- autonomic effects during severe arterial hypoxia in unanesthetized rabbit, 671
- cardiovascular performance of Alaska sled dogs during exercise, 33
- to cutaneous and muscular beds of forearm at rest and during leg exercise in normal subjects and in congestive heart failure, 799
- effect of hematocrit value upon electromagnetic flowmeter sensitivity, 875
- endotoxin effects on regional circulation, 777
- myocardial oxygen metabolism and myocardial blood flow in dogs in hemorrhagic shock, 901
- placental
 - acetylcholinesterase at a cholinergic vasodilator nerve-arterial smooth muscle synapse, 61
- pulmonary
 - distribution in lung edema, 807
 - right ventricular pressure differences, 397
- renal
 - autoregulation and vascular responsiveness, 599

Blood pressure

- arterial
 - aldosterone secretion during hemorrhage, 893
 - hemodynamics of sleep, 923
 - bilateral carotid sinus control of ventricle, 321
 - cardiovascular performance of Alaska sled dogs during exercise, 33
 - endotoxin-induced regional circulatory changes in unanesthetized monkey, 777
 - fiber orientation in canine left ventricle during diastole and systole, 339
 - oxygen and myocardial blood flow in shock, 901
 - vasopressin-induced bradycardia, 787

Blood vessels

- erythrocyte velocity and velocity pulse in minute blood vessels on surface of the mouse brain, 887

- pulmonary blood flow distribution in edema, 807

Blood volume

- aldosterone secretion during hemorrhage, 893
- circulatory responses to heating and cooling, 711
- luminal coronary collateral circulation, 735

Books Received, 487**Bradycardia**

- mechanism of vasopressin-induced bradycardia in dogs, 787

Brain

- endotoxin effects on regional circulation, 777
- red cell velocity in cerebral microcirculation, 887

Bronchitis

- serial studies in acute respiratory failure, 51

Buffer nerve section

- hemodynamics of neurogenic hypertension, 911

C**Calcium**

- effect of cardiotonic lactones on calcium metabolism of dog cardiac microsomes, 793

- effect of contractility on left ventricular response to vagus nerve stimulation in dogs, 303

- effect of ouabain on energy output of rabbit cardiac muscle, 951

- glucose and action potential of cardiac muscle, 939

- healing-over of myocardial cells of toads, 475

- inotropic effects of electric currents and excitation-contraction coupling, 409

- qualitative distinction between the beta-receptor-blocking and local anesthetic actions of antiarrhythmic agents, 835

Cardiac output

- circulatory responses to heating and cooling, 711
- endotoxin-induced regional circulatory changes in unanesthetized monkey, 777
- hemodynamics of neurogenic hypertension, 911
- hemodynamics of sleep, 923

Cardioinhibitory center

- vasopressin-induced bradycardia, 787

Cardiotonic activity

- lactones and calcium metabolism, 793

Cardiotonic agents

- effect of contractility on left ventricular response to vagus nerve stimulation in dogs, 303

Cardiovascular reserve

- of Alaska sled dogs, 33

Carotid arteries

- elastic symmetry of arterial segments, 1
- occlusions, carotid sinus reflex, 447

Carotid sinus

- bilateral control of ventricular performance in the dog, 321
- relative roles of sympathetic and parasympathetic nervous systems in carotid sinus reflex in dogs, 447
- vasopressin-induced bradycardia, 787

Catechol-O-methyl transferase

- hydrocortisone potentiation, 383

Catecholamines

- dopamine and coronary hemodynamics, 699
- hydrocortisone potentiation, 383
- norepinephrine in hypertensive rat, 85

Cells

- calcium exchange in, studied by direct counting of cellular activity of labeled calcium, 589
- chromaffin, norepinephrine in failing bovine heart, 71
- effect of exogenous adenosine triphosphate on metabolism of hypothermic dog heart, 617
- endothelial, mechanical stress and intimal change, 93
- intimal
 - incorporation of oleic acid into lipid by foam cells in human atherosclerotic lesions, 123
- lysosomal enzymes in myocardial infarction, 851
- red cells
 - effect of hematocrit value upon electromagnetic flowmeter sensitivity, 875
 - velocity in cerebral microcirculation, 887

Chemistry

- histological and chemical responses of vascular interface to acutely induced mechanical stress in aorta of the dog, 93

Chemoreceptors

- autonomic effects during severe arterial hypoxia in unanesthetized rabbit, 671
- hemodynamics of sleep, 923
- neural integration in arterial hypoxia, 757

Chlorothiazide

- renin excretion, 689

Cholesterol

- incorporation of oleic acid into lipid by foam cells in atherosclerotic lesions, 123

Chromatography

aldosterone secretion during hemorrhage, 893

Circulation

endotoxin-induced regional circulatory changes in unanesthetized monkey, 777

luminal coronary collateral circulation, 735

microcirculation

erythrocyte velocity and a velocity pulse in minute blood vessels on surface of the mouse brain, 887

neural integration in arterial hypoxia, 757

peripheral

autonomic effects during severe arterial hypoxia in unanesthetized rabbit, 671

pulmonary

blood flow distribution in edema, 807

responses to heating and cooling, 711

skin and muscle blood flow with exercise, 799

Deflandre, 488**Cocaine**

cutaneous vasoconstrictor response to local cooling in the dog, 607

hydrocortisone potentiation, 383

Computer analysis

carotid sinus control of ventricle, 321

electrical potential distribution, 857

Conduction

electrical potential distribution surrounding atria during depolarization and repolarization in the dog, 857

halothane and cardiac fibers, 745

Conduction block

interaction of transmembrane potentials in canine

Purkinje fibers and at Purkinje fiber-muscle junctions, 361

Congenital anomalies

membranous septal defects, multigenic origin, 629

Congestive heart failure

energy utilization in, 313

skin and muscle blood flow with exercise, 799

Contractility

bilateral carotid sinus control of ventricular performance in the dog, 321

distinction between beta-receptor-blocking and local anesthetic actions of antiarrhythmic agents, 835

effect of ouabain on energy output of rabbit cardiac muscle, 951

effect on left ventricular response to vagus nerve stimulation in dogs, 303

glucose and action potential of cardiac muscle, 939

inotropic effects of electric currents, 409

myocardial oxygen consumption and heart rate, 725

Control system

autonomic effects during severe arterial hypoxia in unanesthetized rabbit, 671

Cooling technique

cutaneous vasoconstrictor response to local cooling in the dog, 607

Coronary arteries

blood flow, effect of dopamine, 699

luminal coronary collateral circulation, 735

vasopressin-induced bradycardia, 787

Creatine phosphate

energy utilization in heart failure, 313

D**Deoxyribonuclease**

lysosomal enzymes in myocardial infarction, 851

Depolarization**diastolic**

development of action potential of the prenatal rat heart, 19

electrophysiological actions of lidocaine on canine ventricular muscle and Purkinje fibers, 639

electrical potential distribution surrounding atria during repolarization and, in the dog, 857

inotropic effects of electric currents, 409

Desoxycorticosterone acetate

synthesis and turnover of norepinephrine in hypertensive rat, 85

Diastole

development of action potential of the prenatal rat heart, 19

fiber orientation in canine left ventricle during diastole and systole, 339

Dissociation constant

binding characteristics of myosin and F-actin from dog hearts, 657

Diurnal variations

renin excretion, 689

Dopamine

effect on coronary hemodynamics in dogs, 699

Dreams

reflex regulation of arterial pressure during sleep, 109

Drugs

antiarrhythmic agents, qualitative distinction between the beta-receptor-blocking and local actions of, 835

E

- Edema**
 - pulmonary
 - blood flow distribution in, 807
 - sodium recovery from normal and edematous lungs studied by indicator dilution curves, 815
- EDTA**
 - healing-over of myocardial cells of toads, 475
- Effective refractory period**
 - electrophysiological actions of lidocaine on canine ventricular muscle and Purkinje fibers, 639
- Elastic properties**
 - elastic symmetry of arterial segments in dogs, 1
- Electric currents**
 - inotropic effects of, 409
- Electrical potential distribution**

norepinephrine in, 85
pulmonary
 serial studies in acute respiratory failure, 51
 reflex regulation of arterial pressure during sleep, 109
- Hypertonic sucrose**
healing-over of myocardial cell of toads, 475
- Hypertrophy**
biochemical correlates
 increased rate of RNA synthesis in experimental cardiac hypertrophy in the rat, 9
ventricular
 canine right and left ventricular cell and sarcomere lengths after banding the pulmonary artery, 705
- Hypothalamus**
sympathetic ganglia and the defense reaction in the cat, 843
- Hypothermia**
effect of exogenous ATP on metabolism of excised hypothermic dog heart, 617
effects of pronethalol and, on ionic correlates of ouabain arrhythmias in dogs, 43
- Hypoxia**
arterial
 autonomic effects during severe, in unanesthetized rabbit, 671
 central nervous integration of the circulatory and respiratory responses in rabbits, 757
 pulmonary vasoconstriction
 serial studies in acute respiratory failure, 51

I

- Indicator dilution curves**
sodium recovery from normal and edematous lungs, 815
- Injury potentials**
healing-over of myocardial cells of toads, 475
- Innervation, cardiac**
hemodynamics of sleep, 923
- Inotropic effects**
of electric currents, 409
myocardial oxygen consumption and heart rate, 725

Inotropic stimuli

- effect on contractility on left ventricular response to vagus nerve stimulation in dogs, 303

Inotropism

- dopamine and coronary hemodynamics, 699

Intercalated disks

- healing-over of myocardial cells of toads, 475

Intercellular junctions

- healing-over of myocardial cells of toads, 475

Intimal tissues

- histological and chemical responses of vascular interface to acutely induced mechanical stress in aorta of dog, 93

Intraneuronal deamination

- norepinephrine in hypertensive rat, 85

Isometric studies

- effect of ouabain on energy output of cardiac muscle, 951

Isotonic studies

- effect of ouabain on energy output of cardiac muscle, 951

Isotope labeling

- sodium recovery in pulmonary edema, 815

Isovolumetric preparation

- carotid sinus control of ventricular performance in the dog, 321

K**Kidneys**

- autoregulation and vascular responsiveness, 599
- endotoxin effects on regional circulation, 777

L**Lactones**

- effect on calcium metabolism, 793

Left ventricles

- contractility, response to vagus nerve stimulation in dogs, 303
- fiber angle during diastole and systole, 339
- isovolumic contractions
- myocardial oxygen consumption and heart rate, 725
- wall structure
- fiber orientation during diastole and systole, 339

Leg exercise

- skin and muscle blood flow with exercise, 799

Length-force curve

- force-velocity relationship of cat cardiac muscle, 821

Lesions

- atherosclerotic, incorporation of oleic acid into lipid by foam cells in, 123

Lidocaine

- antiarrhythmic agents, 835
- electrophysiological actions on canine ventricular muscle and Purkinje fibers, 639

Light scattering

- binding characteristics of myosin and F-actin from dog hearts, 657

Lipids

- incorporation of oleic acid by foam cells in atherosclerotic lesions, 123

Lumen, cardiac

- luminal coronary collateral circulation, 735

Lungs

- neural integration in arterial hypoxia, 757
- pulmonary blood flow distribution in edema, 807
- sodium recovery from normal and edematous lungs studied by indicator dilution curves, 815

M**Magnesium ions**

- healing-over of myocardial cells of toads, 475

Mast cells

- norepinephrine in failing bovine heart, 71

Membrane potentials

- effects of halothane on single atrial, ventricular, and Purkinje fibers, 745

Membranous septal defects

- multigenic origin, 629

Metabolism

- effect of adenosine triphosphate on excised hypothermic dog heart, 617
- myocardial oxygen consumption and heart rate, 725

Microcinematography

- red cell velocity in cerebral microcirculation, 887

Microcirculation

- erythrocyte velocity and velocity pulse in minute blood vessels on surface of the mouse brain, 887

Microscopy

- healing-over of myocardial cells of toads, 475
- structure of the electrophysiological A-V node, 457

Microsomal fraction

- effect of cardiotonic lactones on calcium metabolism of dog cardiac microsomes, 793

Microspheres

- endotoxin effects on regional circulation, 777
- endotoxin effects on regional circulation, 777

Models

- carotid sinus control of ventricles, 321

Monitoring

- radiotelemetry
- cardiovascular performance of Alaska sled dogs during exercise, 33

Muscles

- localization of acetylcholinesterase at a cholinergic vasodilator nerve-arterial smooth muscle synapse, 61
- papillary
- effect of ouabain on energy output of, 951
- force-velocity relationships, 821
- influence of glucose on action potential of, 939
- interaction of transmembrane potentials in Purkinje fiber and at Purkinje fiber-muscle junctions, 361
- skeletal
- sympathetic ganglia and the defense reaction in the cat, 843
- skin and muscle blood flow with exercise, 799
- smooth
- cutaneous venoconstrictor response to local cooling in the dog, 607
- hydrocortisone potentiation, 383
- sympathetic control of the dog femoral artery, 349

Myocardial infarction

- lysosomal enzymes in, 851

Myocardium

- cells
- study on the healing-over, 475
- continuum
- fiber orientation in canine left ventricle during diastole and systole, 339
- contractility
- bilateral carotid sinus control of ventricular performance in the dog, 321
- distinction between beta-receptor-blocking and local anesthetic actions of antiarrhythmic agents, 835

- preservation of ventricular function by adrenergic influences during metabolic acidosis in the cat, 373
- force-velocity relationship, studied by isotonic and quick-release techniques, 821
- infarction. *See* Myocardial infarction
- innervation
 - norepinephrine in failing bovine heart, 71
- nucleotides, increased rate of RNA synthesis in experimental cardiac hypertrophy, 9
- oxygen consumption
 - effect of dopamine, 699
 - heart rate in dogs and, 725
- oxygen metabolism and blood flow in dogs in hemorrhage shock, 901
- Myosin**
 - binding characteristics of actin and, 657
- Myothermic techniques**
 - effect of ouabain on energy output of cardiac muscle, 951
- N**
- Nerves**
 - left ventricular contractility response to vagus nerve stimulation in dogs, 303
 - localization of acetylcholinesterase at a cholinergic vasodilator nerve-arterial smooth muscle synapse, 61
- Nervous system**
 - autonomic
 - carotid sinus control of ventricle, 321
 - effect of contractility on left ventricular response to vagus nerve stimulation in dogs, 303
 - effects during severe arterial hypoxia in unanesthetized rabbit, 671
 - preservation of ventricular function by adrenergic influences during metabolic acidosis in the cat, 373
 - central
 - integration of the circulatory and respiratory responses to arterial hypoxia in the rabbit, 757
 - sympathectomy, cutaneous vasoconstrictor response to local cooling in the dog, 607
 - sympathetic
 - endotoxin effects on regional circulation 777
 - influence of stimulation on right ventricular outflow-tract pressures in dogs, 397
 - range of sympathetic control of the dog femoral artery, 349
 - relative roles of sympathetic and parasympathetic, in carotid sinus reflex in dogs, 447
- Norepinephrine**
 - autoregulation and vascular responsiveness, 599
 - cutaneous vasoconstrictor response to local cooling in the dog, 607
 - in the failing bovine heart, 71
 - hydrocortisone potentiation of responses to epinephrine and, in rabbit aorta, 383
 - in hypertensive rat, 85
- Nucleotides**
 - myocardial, increased rate of RNA synthesis in experimental cardiac hypertrophy, 9
- O**
- Occlusions**
 - pulmonary arteries, right ventricular pressure differences, 397
- Oil immersion technique**
 - hydrocortisone potentiation, 383
- Oleic acid**
 - incorporation into lipid by foam cells in human atherosclerotic lesions, 123

Orthotropic elastic properties

elastic symmetry of arterial segments in dogs, 1

Ouabain

- effect on energy output of rabbit cardiac muscle, 951
- effects of hypothermia and pronethalol on ionic correlates of ouabain arrhythmias in dogs, 43
- glucose and action potential of cardiac muscle, 939

Oxygen

- myocardial oxygen consumption
 - effect of dopamine, 699
- oxygen metabolism and blood flow in dogs in hemorrhagic shock, 901
- serial studies in acute respiratory failure, 51

P**Pacing and pacemakers**

- development of action potential of the prenatal rat heart, 19
- paired pacing, effect of contractility on left ventricular response to vagus nerve stimulation in dogs, 303

Papillary muscles

- effect of ouabain on energy output of, 951
- force-velocity relationship, studied by isotonic and quick-release techniques, 821
- glucose and action potential of cardiac muscle, 939
- interaction of transmembrane potentials in Purkinje fibers and at Purkinje fiber-muscle junctions, 361
- utilization of high-energy phosphates in experimental heart failure in cats, 313

Perfusion pressure

autoregulation and vascular responsiveness, 599

Peripheral circulation

autonomic effects during severe arterial hypoxia in unanesthetized rabbit, 671

Peripheral vascular resistance

- circulatory responses to heating and cooling, 711
- endotoxin effects on regional circulation, 777
- hemodynamics of neurogenic hypertension, 911

Phenoxybenzamine

sympathetic ganglia and the defense reaction in the cat, 843

Phosphates

utilization of high-energy phosphates in experimental heart failure in cats, 313

Phospholipids

incorporation of oleic acid into lipid by foam cells in atherosclerotic lesions, 123

Physiology

calcium exchange in rat cardiac cells, 589

Plasma

effect of hematocrit value upon electromagnetic flowmeter sensitivity, 875

Postsynaptic potential

sympathetic ganglionic transmission and the cardiovascular changes of the defense reaction in the cat, 843

Potassium

effects of hypothermia and pronethalol on ionic correlates of ouabain arrhythmias in dogs, 43

Potential distribution

surrounding atria during depolarization and repolarization in the dog, 857

Potentiation

poststimulation, inotropic effects of electric currents, 409

Pregnancy

- acetylcholinesterase at a cholinergic vasodilator nerve-arterial smooth muscle synapse, 61

Pressure

- arterial
 - reflex regulation during sleep, 109
 - serial studies in acute respiratory failure, 51
- perfusion
 - autoregulation and pressure dependency or renal vascular responsiveness in dogs, 599
- right ventricular pressure differences, 397
- venous, circulatory responses to heating and cooling, 711

Propranolol

- effects of hypothermia and, on ionic correlates of ouabain arrhythmias in dogs, 43

Propranolol

- antiarrhythmic agents, 835

Protein

- excretion, observations on origin of renin in urine, 689

Pulmonary artery

- arterial pressure
 - serial studies in acute respiratory failure, 51
- banding
 - canine right and left ventricular cell and sarcomere lengths after banding the pulmonary artery, 705
- occlusion
 - right ventricular pressure differences, 397

Pulsatile flow

- erythrocyte velocity and a velocity pulse in minute blood vessels on the surface of the mouse brain, 887

Pulse

- erythrocyte velocity and velocity pulse in minute blood vessels on surface of mouse brain, 887
- reflex regulation of arterial pressure during sleep, 109

Purkinje fibers

- effects of halothane on, 745
- electrophysiological actions of lidocaine on canine ventricular muscle and Purkinje fibers, 639
- interaction of transmembrane potentials in canine Purkinje fibers and at Purkinje fiber-muscle junctions, 361

Q**Quinidine**

- antiarrhythmic agents, 835

R**Radioactivity**

- calcium exchange in rat cardiac cells, 589
- endotoxin effects on regional circulation, 777

Radioautography

- incorporation of oleic acid into lipid by foam cells in atherosclerotic lesions, 123

Radiotelemetry

- cardiovascular performance of Alaska sled dogs during exercise, 33

Reflexes

- carotid sinus, 447

Reflex sensitivity

- regulation of arterial pressure during sleep, 109

Refractory period

- electrophysiological actions of lidocaine on canine ventricular muscle and Purkinje fibers, 639
- halothane and cardiac fibers, 745

Renin

- observations on excretion into urine, 689

Repolarization

- electrical potential distribution surrounding atria during depolarization and, in the dog, 857
- glucose and action potential of cardiac muscle, 939

Reserpine

- hydrocortisone potentiation, 383

Resistance vessels

- hemodynamics of sleep, 923

Respiration

- neural integration in arterial hypoxia, 757
- serial studies in acute respiratory failure, 51

Rheology

- mechanical stress and intimal change in aorta of the dog, 93

Rhinencephalic preparations

- neural integration in arterial hypoxia, 757

Ribonucleic acid (RNA)

- base composition of, 9
- increased rate of RNA synthesis in experimental cardiac hypertrophy, 9

S**Salt**

- norepinephrine in hypertensive rat, 85

Saphenous veins

- cutaneous venoconstrictor response to local cooling in the dog, 607

Sarcomere lengths

- canine right and left ventricular cell and sarcomere lengths after banding the pulmonary artery, 705

Sarcoplasmic reticulum

- effect of cardiotonic lactones on calcium metabolism of dog cardiac microsomes, 793
- qualitative distinction between the beta-receptor-blocking and local anesthetic actions of antiarrhythmic agents, 835

Septal artery

- luminal coronary collateral circulation, 735

Septal defects

- membranous, multigenic origin, 629

Shearing strains

- elastic symmetry of arterial segments, 1
- fiber orientation in canine left ventricle during diastole and systole, 339

Shearing stress

- mechanical stress and intimal change in aorta of the dog, 93

Shock

- aldosterone secretion during hemorrhage, 893
- myocardial oxygen metabolism and blood flow in dogs in hemorrhagic shock, 901

Sinoaortic deafferentation

- hemodynamics of sleep, 923

Sinus rate

- relative roles of sympathetic and parasympathetic nervous systems in carotid sinus reflex in dogs, 447

Skeletal muscles

- sympathetic ganglia and the defense reaction in the cat, 843

Skin

- circulatory responses to rapid changes during exercise, 711
- and muscle blood flow with exercise, 799

Sleep

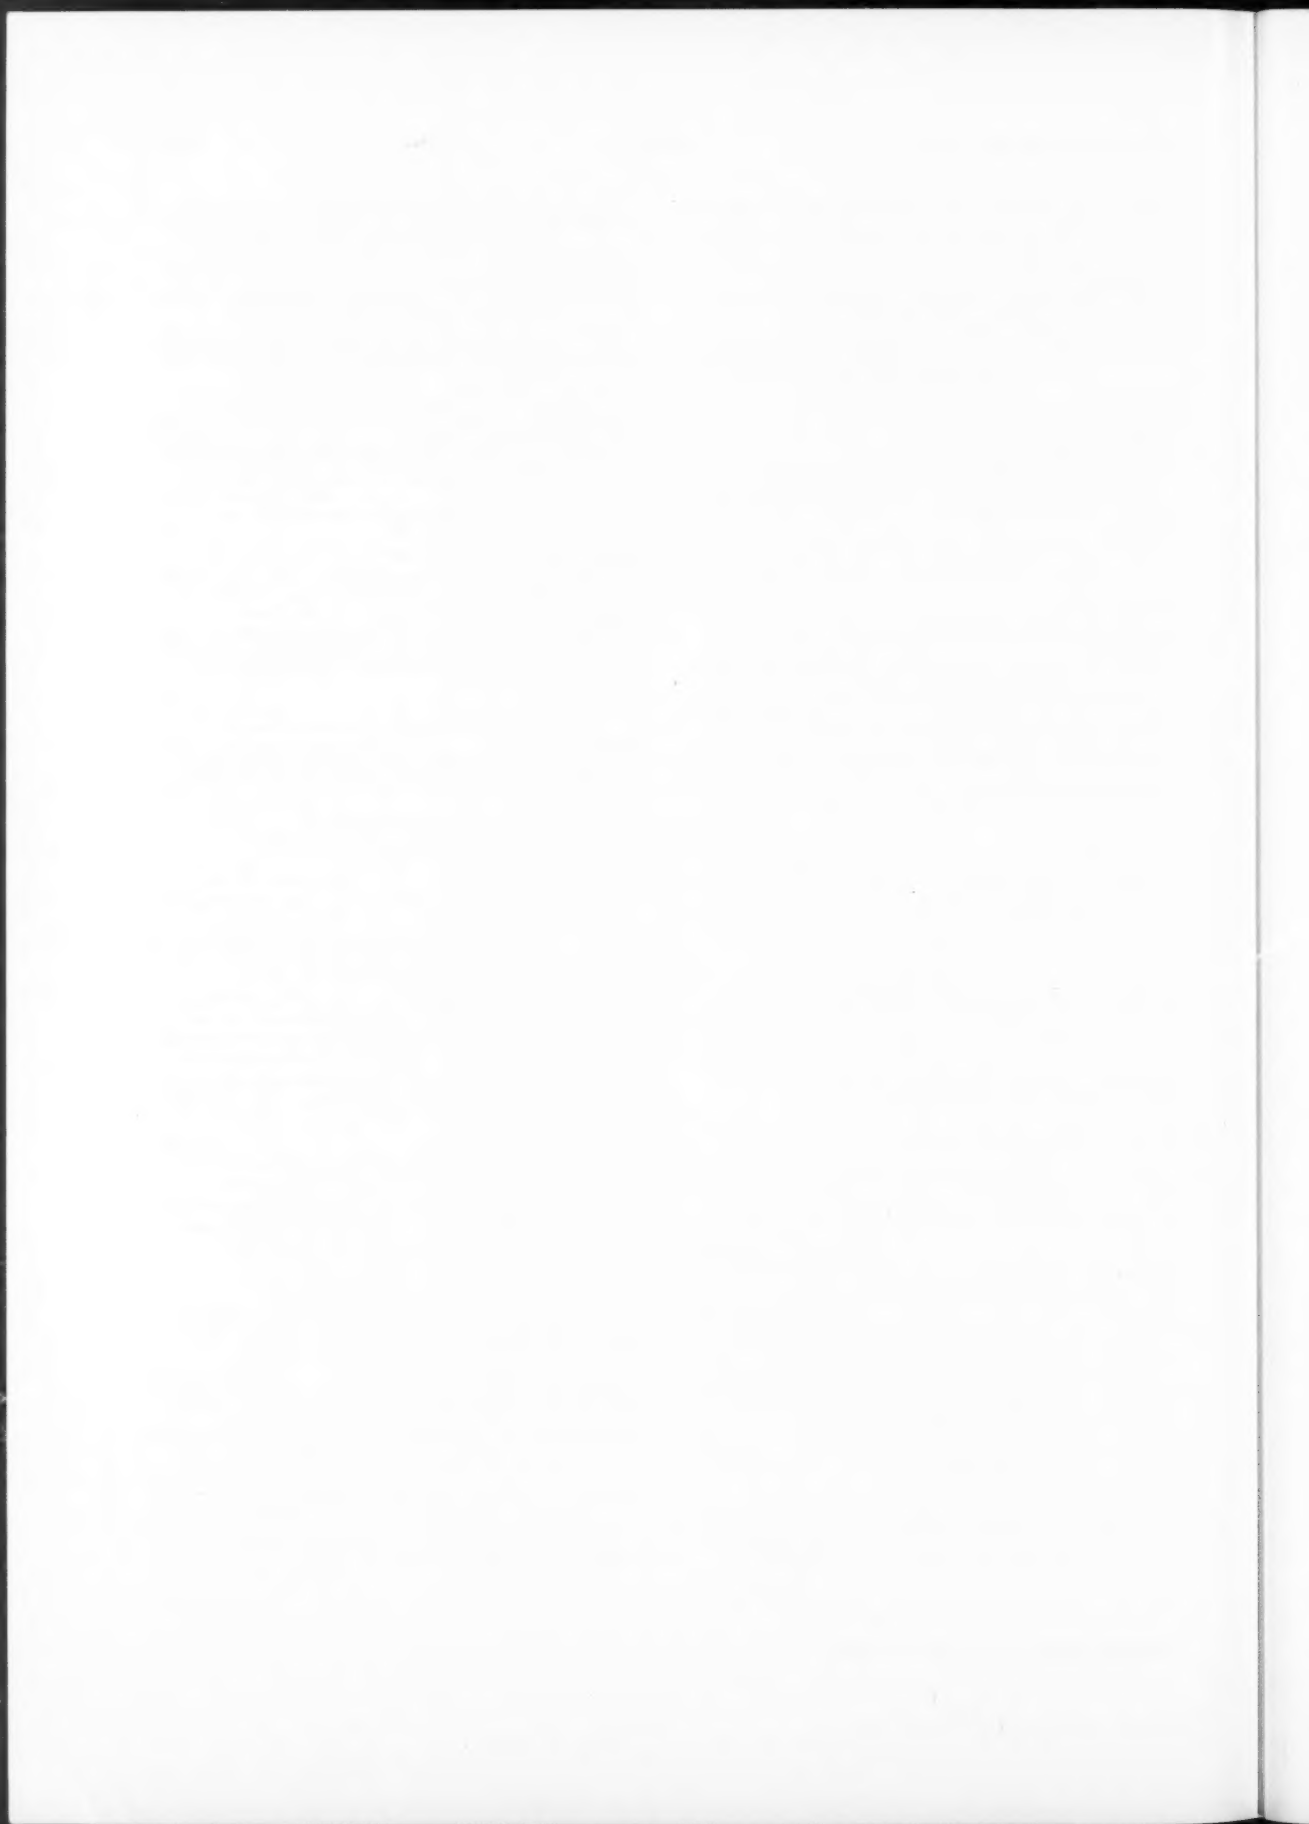

- hemodynamic patterns during desynchronized sleep and sinoaortic deafferentation, 923
- hemodynamics of neurogenic hypertension, 911
- reflex regulation of arterial pressure during, 109

Smooth muscles

- cutaneous venoconstrictor response to local cooling in the dog, 607

- hydrocortisone potentiation, 383
 - sympathetic control of the dog femoral artery, 349
 - Sodium**
 - effects of hypothermia and pronethalol on ionic correlates of ouabain arrhythmias in dogs, 43
 - norepinephrine in hypertensive rat, 85

Circulation Research

AN OFFICIAL JOURNAL OF THE AMERICAN HEART ASSOCIATION

VOLUME XXIV

January-June
1969

AMERICAN HEART ASSOCIATION, INC.

Circulation Research

An Official Journal of the American Heart Association

Circulation Research provides a medium for bringing together basic research on the cardiovascular system from various disciplines including biology, biochemistry, biophysics, morphology, pathology, physiology and pharmacology. The Journal will also accept for publication manuscripts on clinical research that contribute to an understanding of fundamental problems.

Circulation Research

AN OFFICIAL JOURNAL OF THE AMERICAN HEART ASSOCIATION

Volume XXIV

January-June

1969

No. 1 (January)

The Elastic Symmetry of Arterial Segments in Dogs. Dali J. Patel and Donald L. Fry	1
Biochemical Correlates of Cardiac Hypertrophy: II. Increased Rate of RNA Synthesis in Experimental Cardiac Hypertrophy in the Rat. Tadashi Koide and Murray Rabinowitz	9
Development of the Action Potential of the Prenatal Rat Heart. James R. Couch, Theodore C. West, and Hebbel E. Hoff	19
Cardiovascular Performance of Alaska Sled Dogs during Exercise. Robert L. Van Citters and Dean L. Franklin	33
Effects of Hypothermia and Pronethalol on Ionic Correlates of Ouabain Arrhythmias in Dogs. S. B. I. El-Fiky and B. G. Katzung	43
Factors Contributing to the Reversible Pulmonary Hypertension of Patients with Acute Respiratory Failure Studied by Serial Observations during Recovery. A. S. Abraham, R. B. Cole, I. D. Green, R. B. Hedworth-Whitty, S. W. Clarke, and J. M. Bishop	51
Fine Structural Localization of Acetylcholinesterase at a Cholinergic Vasodilator Nerve-Arterial Smooth Muscle Synapse. Christopher Bell	61
Distribution of Norepinephrine in the Failing Bovine Heart: Correlation of Chemical Analysis and Fluorescence Microscopy. John H. K. Vogel, David Jacobowitz, and Charles A. Chidsey	71
Synthesis and Turnover of Norepinephrine in the Heart of the Spontaneously Hypertensive Rat. William J. Louis, Sydney Spector, Ryo Tabei, and Albert Sjoerdsma	85
Certain Histological and Chemical Responses of the Vascular Interface to Acutely Induced Mechanical Stress in the Aorta of the Dog. Donald L. Fry	93
Reflex Regulation of Arterial Pressure during Sleep in Man: A Quantitative Method of Assessing Baroreflex Sensitivity. Harley S. Smyth, Peter Sleight, and George W. Pickering	109
Incorporation of Oleic Acid into Lipid by Foam Cells in Human Atherosclerotic Lesions. Mark L. Wahlqvist, Allan J. Day, and Ronald K. Tume	123
Classic Pages	32, 92, 122
News from the American Heart Association	131
Author Index	135

No. 2 (February)

Force-Velocity-Length-Time Relations of the Contractile Elements in Heart Muscle of the Cat. Dirk L. Brutsaert and Edmund H. Sonnenblick	137
Activation of Adenyl Cyclase by Glucagon in Cat and Human Heart. Gerald S. Levey and Stephen E. Epstein	151
Effect of Replacement of Potassium by Rubidium on the Transmembrane Action Potential and Contractility of Human Papillary Muscle. Kailash Prasad and John C. Callaghan	157
Effects of Glucagon on Atrioventricular Conduction and Ventricular Automaticity in Dogs. Charles Steiner, Andrew L. Wit, and Anthony N. Damato	167
Effect of Prolonged Cold Storage on the Contractile Response of Strips of Rabbit Aorta to Various Agents. Shoji Shibata	179
Conformational Changes in Myocardial Nuclei of Rats. S. Bloom and P. A. Cancilla	189
Interstitial Pressure of the Lung. Robert B. Mellins, O. Robert Levine, Richard Skalak, and Alfred P. Fishman	197
Hepatic Clearance of Renin in Canine Experimental Models for Low- and High-Output Heart Failure. Edward G. Schneider, James O. Davis, Charles A. Robb, and John S. Baumber	213
Application of the Theory of Heat Exchangers to the Transfer of Inert Materials in Placentas. J. Job Faber	221
Application of the Theory of Heat Exchangers to a Physiological Study of the Goat Placenta. John H. G. Rankin and Edward N. Peterson. . .	235
Refractory Period of the Dog's Ventricular Myocardium Following Sudden Changes in Frequency. M. J. Janse, A. B. M. van der Steen, R. Th. van Dam, and D. Durrer	251
Inhibition of Binding of Tritiated Digoxin to Myocardium by Sodium Depletion in Dogs. Carlos E. Harrison, Jr., and Khalil G. Wakim	263
Left Ventricular Filling and Diastolic Pressure-Volume Relations in the Conscious Dog. Mark I. M. Noble, Eric N. C. Milne, R. Jon Goerke, Erik Carlsson, Raul J. Domenech, Kenneth B. Saunders, and Julien I. E. Hoffman	269
Effect of Changes in Heart Rate on Left Ventricular Performance in Conscious Dogs. Mark I. M. Noble, Jane Wyler, Eric N. C. Milne, Diana Trenchard, and Abraham Guz	285
Classic Pages	150, 178, 188, 220, 284, 296
News from the American Heart Association	297
Author Index	301

No. 3 (March)

Effect of Enhanced Contractility on the Left Ventricular Response to Vagus Nerve Stimulation in Dogs. Matthew N. Levy and Harrison Zieske	303
--	-----

(Continued)

Mechanochemistry of Cardiac Muscle: IV. Utilization of High-Energy Phosphates in Experimental Heart Failure in Cats. Peter E. Pool, Brian M. Chandler, James F. Spann, Jr., Edmund H. Sonnenblick, and Eugene Braunwald	313
Bilateral Carotid Sinus Control of Ventricular Performance in the Dog. Paul J. Martin, Matthew N. Levy, and Harrison Zieske	321
Fiber Orientation in the Canine Left Ventricle during Diastole and Systole. Daniel D. Streeter, Jr., Henry M. Spotnitz, Dali J. Patel, John Ross, Jr., and Edmund H. Sonnenblick	339
Range of the Sympathetic Control of the Dog Femoral Artery. Mária Gerová and Ján Gero	349
Interaction of Transmembrane Potentials in Canine Purkinje Fibers and at Purkinje Fiber-Muscle Junctions. Carlos Mendez, William J. Mueller, John Merideth, and Gordon K. Moe	361
Preservation of Ventricular Function by Adrenergic Influences during Metabolic Acidosis in the Cat. Jose M. Rocamora and S. Evans Downing	373
Mechanism of Hydrocortisone Potentiation of Responses to Epinephrine and Norepinephrine in Rabbit Aorta. Stanley Kalsner	383
Influence of Sympathetic Nerve Stimulation on Right Ventricular Out-flow-Tract Pressures in Anesthetized Dogs. John B. Pace, William F. Keefe, J. Andrew Armour, and Walter C. Randall	397
Inotropic Effects of Electric Currents: I. Positive and Negative Effects of Constant Electric Currents or Current Pulses Applied during Cardiac Action Potentials. II. Hypotheses: Calcium Movements, Excitation-Contraction Coupling and Inotropic Effects. Earl H. Wood, Richard L. Heppner, and Silvio Weidmann	409
Relative Roles of Sympathetic and Parasympathetic Nervous Systems in the Carotid Sinus Reflex in Dogs. Walter D. Berkowitz, Benjamin J. Scherlag, Emanuel Stein, and Anthony N. Damato	447
Anatomical and Ultrastructural Study of the Electrophysiological Atrio-ventricular Node of the Rabbit. Louis J. DeFelice and Cyril E. Challice	457
A Study on the Healing-over of Myocardial Cells of Toads. W. C. de Mello, G. E. Motta, and M. Chapeau	475
Books Received	487
Classic Pages	312, 338, 348, 360, 382, 396, 408, 446, 456, 488
News from the American Heart Association	489
Author Index	492

No. 4 (April)

Factors Affecting Shunting in Experimental Atrial Septal Defects in Dogs. John E. Douglas, Judith C. Rembert, Will C. Sealy, and Joseph C. Greenfield, Jr.	493
Depressed Adenyl Cyclase Activity in the Failing Guinea Pig Heart. Burton E. Sobel, Philip D. Henry, Alice Robison, Colin Bloor, and John Ross, Jr.	507

(Continued)

Reduced Cardiac Myosin Adenosinetriphosphatase Activity in Dogs with Spontaneously Occurring Heart Failure. Robert J. Luchi, Eve Marie Kritcher, and Per T. Thyrum	513
Effects of Altered Loading on Contractile Events in Isolated Cat Papillary Muscle. William W. Parmley, Dirk L. Brutsaert, and Edmund H. Sonnenblick	521
Change of Cardiac Rhythm in the Rabbit after an Atrial Premature Beat. Felix I. M. Bonke, Lennart N. Bouman, and Henry E. van Rijn	533
Catecholamine Synthesis in Rabbits with Neurogenic Hypertension. Vincent DeQuattro, Toshiharu Nagatsu, Robert Maronde, and Natalie Alexander	545
Effects of Changes in Carbon Dioxide Pressure and Arterial Pressure on Blood Flow in Ischemic Regions of the Brain in Dogs. Kyuya Kogure, Masatoshi Fujishima, Peritz Scheinberg, and Oscar M. Reinmuth	557
Effect of Combined Sympathetic and Vagal Stimulation on Heart Rate in the Dog. Homer R. Warner and Richard O. Russell, Jr.	567
Comparison of Calculations of Left Ventricular Wall Stress in Man from Thin-Walled and Thick-Walled Ellipsoidal Models. William P. Hood, Jr., Walter J. Thomson, Charles E. Rackley, and Ellis L. Rolett ..	575
News from the American Heart Association	583
Author Index	587
Classic Pages	506, 520, 556, 566, 574

No. 5 (May)

Calcium Exchange in a Single Layer of Rat Cardiac Cells Studied by Direct Counting of Cellular Activity of Labeled Calcium. G. A. Langer, E. Sato, and M. Seraydarian	589
Association between Autoregulation and Pressure Dependency of Renal Vascular Responsiveness in Dogs. John L. McNay and Taketoshi Kishimoto	599
Cutaneous Venoconstrictor Response to Local Cooling in the Dog: Unexplained by Inhibition of Neuronal Re-uptake of Norepinephrine. Michael M. Webb-Peploe	607
Effect of Exogenous Adenosine Triphosphate on the Metabolic State of the Excised Hypothermic Dog Heart. Margita Fedelešová, Attila Ziegelhöffer, Ernst-Georg Krause, and Albert Wollenberger	617
Evidence Suggesting a Multigenic Origin of Membranous Septal Defect in Rats. Marjorie Hopkins Fox	629
Electrophysiological Actions of Lidocaine on Canine Ventricular Muscle and Purkinje Fibers. L. D. Davis and J. V. Temte	639
Binding Characteristics of Myosin and F-Actin from Dog Hearts. Gene Conway, Robert Heazlitt, Joe L. Roberts, and Leroy Stewart	657
Dynamic Characteristics of the Cardiovascular Autonomic Effects during Severe Arterial Hypoxia in the Unanesthetized Rabbit. Paul I. Korner and John B. Uther	671
Observations on the Origin of Renin in Human Urine. Eugenie R. Lumbers and S. L. Skinner	689

(Continued)

Dopamine-Induced Alterations in Coronary Hemodynamics in Dogs. Harold L. Brooks, Paul D. Stein, James L. Matson, and John W. Hyland	699
Canine Right and Left Ventricular Cell and Sarcomere Lengths after Banding the Pulmonary Artery. Michael M. Laks, Fred Morady, and H. J. C. Swan	705
Human Cardiovascular Adjustments to Rapid Changes in Skin Temperature during Exercise. Loring B. Rowell, John A. Murray, George L. Brengelmann, and Kenneth K. Kraning, II	711
Increased Myocardial Oxygen Consumption and Contractile State Associated with Increased Heart Rate in Dogs. Robert C. Boerth, James W. Covell, Peter E. Pool, and John Ross, Jr.	725
Study of Luminal Coronary Collateral Circulation in the Beating Canine Heart. Thomas W. Moir	735
Effects of Halothane on Single Atrial, Ventricular, and Purkinje Fibers. Otto Hauswirth	745
Classic Pages	598, 606, 616, 628, 638, 656, 688, 698
News from the American Heart Association	751
Author Index	756

No. 6 (June)

Central Nervous Integration of the Circulatory and Respiratory Responses to Arterial Hypoxemia in the Rabbit. Paul I. Korner, John B. Uther, and Saxon W. White	757
Endotoxin-Induced Regional Circulatory Changes in the Unanesthetized Monkey. Felix Wyler, Ralph P. Forsyth, Alan S. Nies, John M. Nuetze, and Kenneth L. Melmon	777
Mechanism of Vasopressin-Induced Bradycardia in Dogs. Sarla Varma, Bhuwaneshwar P. Jaju, and Krishna P. Bhargava	787
Effect of Cardiotonic Lactones on Calcium Metabolism of Dog Cardiac Microsomes. Mark L. Entman, Joseph W. Cook, Jr., and Rubin Bressler	793
Partition of Blood Flow to the Cutaneous and Muscular Beds of the Forearm at Rest and during Leg Exercise in Normal Subjects and in Patients with Heart Failure. Robert Zelis, Dean T. Mason, and Eugene Braunwald	799
Inadequacy of Perivascular Edema Hypothesis to Account for Distribution of Pulmonary Blood Flow in Lung Edema. Blair C. Ritchie, Gertraud Schauburger, and Norman C. Staub	807
Sodium Recovery from Normal and Edematous Lungs Studied by Indicator Dilution Curves. Morton Lee Pearce	815
Force-Velocity Relationship of Cat Cardiac Muscle, Studied by Isotonic and Quick-Release Techniques. Mark I. M. Noble, T. Earle Bowen, and Lloyd L. Hefner	821
A Qualitative Distinction between the Beta-Receptor-Blocking and Local Anesthetic Actions of Antiarrhythmic Agents. Elliot Sinebourne, Roger White, and John Hamer	835
Sympathetic Ganglionic Transmission and the Cardiovascular Changes of the Defense Reaction in the Cat. Arthur M. Brown	843
(Continued)	

Changes in the Activities of Lysosomal Enzymes in Infarcted Canine Heart Muscle. Kurt G. Ravens and S. Gudbjarnason	851
Electrical Potential Distribution Surrounding the Atria during Depolarization and Repolarization in the Dog. Madison S. Spach, Terry D. King, Roger C. Barr, David E. Boaz, Mary N. Morrow, and Scott Herman-Giddens	857
Effect of Hematocrit Value upon Electromagnetic Flowmeter Sensitivity. Jennifer Dennis and D. G. Wyatt	875
Erythrocyte Velocity and a Velocity Pulse in Minute Blood Vessels on the Surface of the Mouse Brain. William I. Rosenblum	887
Biphasic Stimulation of Aldosterone Secretion during Hemorrhage in Dogs. Louis F. Fabre, Jr., Robert W. Farmer, H. Winston Davis, George McBee, and Gordon Farrell	893
Myocardial Oxygen Metabolism and Myocardial Blood Flow in Dogs in Hemorrhagic Shock: Effects of Hyperbaric Oxygen. Norman B. Ratliff, Donald B. Hackel, and Eileen Mikat	901
Hemodynamic Characteristics of Chronic Experimental Neurogenic Hypertension in Unanesthetized Dogs. Carlos M. Ferrario, James W. McCubbin, and Irvine H. Page	911
Hemodynamic Patterns during Desynchronized Sleep in Intact Cats and in Cats with Sinoaortic Deafferentation. Takao Kumazawa, Giorgio Baccelli, Maurizio Guazzi, Giuseppe Mancia, and Alberto Zanchetti	923
Influence of Glucose on the Transmembrane Action Potential of Guinea-Pig Papillary Muscle: Metabolic Inhibitors Ouabain, and Calcium Chloride, and Their Interaction with Glucose, Sympathomimetic Amines, and Aminophylline. K. Prasad and Don P. MacLeod	939
Effect of Ouabain on the Energy Output of Rabbit Cardiac Muscle. C. L. Gibbs and W. R. Gibson	951
Classic Pages	834, 842, 850, 874, 910, 938

SUBJECT INDEX

VOLUME XXV

JULY-DECEMBER, 1969

A

- Abdominal aortas**
 - comparison of abdominal and thoracic aortic medial structure in mammals, 677
- Acetylcholine**
 - effect of nicotinate ester, acetylcholine and other vasodilating agents on cutaneous and mesenteric vascular smooth muscle, 687
 - sympathetic augmentation and blockade by, 1
- Acetylcholinesterase**
 - cholinergic innervation of autotransplanted canine kidney, 535
- Acetylstrophanthidin**
 - glycoside-induced bradycardia, 365
 - potentiation of adrenergic venomotor responses in dogs by cardiac glycosides, 597
 - reflex cardiovascular effects of epicardial stimulation in dogs, 705
- Actomyosin**
 - inhibition of incorporation of leucine into myocardial proteins by antiarrhythmic agents, 401
- Adenosine**
 - release by normal heart and its relationship to regulation of coronary resistance, 407
- Adenyl cyclase**
 - and calcium transport, 429
- Adrenalectomy**
 - influence of sympathetic nerve stimulation on ventricular function, 417
- Adrenergic stimulation**
 - increased venous response to, 607
- Afferent arterioles**
 - cholinergic innervation of the autotransplanted canine kidney, 535
- African lungfish**
 - heart and circulation, 23
- Afterload**
 - myocardial contractile response to norepinephrine, isoproterenol, and calcium chloride in hyperthyroid guinea pigs, 237
- Aging**
 - difference in geometry of young and old human erythrocytes explained by filtering mechanism, 39
- Alcohols**
 - intrarenal volumes and diffusion of, 343
- Alpha-receptor blockade**
 - cardiovascular reflexes from the abdomen, 713
- Amphetamine**
 - modification by acetylcholine of response of rat mesenteric arteries to sympathetic stimulation, 1
- Anatomy**
 - abdominal and thoracic aortic structure, 677
 - heart and circulation of African lungfish, 23
- Angiotensin**
 - furosemide and renin secretion, 145
 - pseudorenin, new angiotensin-forming enzyme, 451
- Animals**
 - abdominal and thoracic aortic structure, 677
 - African lungfish
 - heart and circulation, 23
 - baboons
 - neural control of cerebral blood flow, 77

cats

- capacitance responses and fluid exchanges during stimulation of hepatic nerves, 277
- cardiovascular responses to mesenteric intra-arterial administration of nicotine, cyanide, and venous blood, 713
- changes in pulmonary circulation after bronchial occlusion, 747
- chronotropic effect of glycosides, 365
- myocardial asynchrony and regional hypoxia, 569

dogs

- autoregulation of total systemic circulation following destruction of central nervous system, 379
- beta-receptor blockade, effects of, 331
- calcium binding and uptake in cardiac muscle, 781
- changes in pulmonary circulation after bronchial occlusion, 747
- cholinergic innervation of autotransplanted canine kidney, 535
- chronotropic effect of glycosides, 365
- countercurrent exchange of heat in dog kidney, 617
- effects of furosemide on renin secretion, 145
- effects of hypoxia and metabolic inhibitors on intrinsic heart rate and myocardial contractility, 53
- effects of ouabain on insulin secretion, 119
- effects of saline loading in canine allotransplantation, 99
- effects of vagus nerve stimulation on heart rate, 303
- function of in-situ papillary muscle in canine left ventricle, 67
- glucagon and cardiac automaticity, 183
- hypertension caused by salt loading, 153
- inotropic responses of atria and ventricles to vagosympathetic stimulation, 265
- intrarenal hematocrit ratio, 669
- intrarenal volumes and diffusion of alcohols, 343
- mechanism of action of epinephrine and glucagon on canine heart, 429
- myocardial blood flow after infarction, 161
- myogenic tone in isolated perfused vessels, 549
- parasympathetic control of coronary blood flow in dogs, 509
- peripheral vascular response to shock, 107
- potentiation of adrenergic venomotor responses in dogs by cardiac glycosides, 597
- P-R interval and amplitude of first heart sounds, 255
- pressure-flow relationships in coronary circulation, 293
- pulmonary arterial pulse wave velocity and impedance, 637
- reflex cardiovascular effects of epicardial stimulation by acetylstrophanthidin in dogs, 705
- release of adenosine by normal myocardium, 407
- static anisotropic elastic properties of dog aorta, 765
- structural and functional characterization of microsomes, 487

- total and regional coronary blood flow measured by radioactive microspheres, 581

 - bradykinin production associated with oxygenation of fetal lamb, 521
 - changes in pulmonary circulation after bronchial occlusion, 747
 - heart and circulation of African lungfish, 23

M

- Macula densa**
 - furosemide and renin secretion, 145
- Mathematical analysis**
 - of oscillatory and non-oscillatory recovery of contractility after a rested-state contraction and its modification by calcium, 725
- Mean transit time**
 - intrarenal volumes and diffusion of alcohols, 343
- Measurements**
 - of cerebral hemispheric blood flow by intracarotid injection of hydrogen gas, 735
 - cutaneous blood flow, 215
 - intrarenal hematocrit ratio with technique of circulatory stop-flow in dogs, 669
 - microvessels
 - radii and wall thickness, 315
- Mechanoreceptors**
 - reflex bradycardia from digitalis, 705
- Medial tension**
 - abdominal and thoracic aortic structure, 677
- Membrane vesicles**
 - calcium binding and uptake in cardiac muscle, 781

- Mesenteric arteries**
 - cardiovascular responses to intra-arterial administration of nicotine cyanide and venous blood, 713
 - modification by acetylcholine of response of rat mesenteric arteries to sympathetic stimulation, 1
 - vasodilators and vascular smooth muscle, 687
- Metabolic inhibitors**
 - effects of hypoxia and, on intrinsic heart rate and myocardial contractility in dogs, 53
- Metabolites**
 - myocardial, release of adenosine by normal myocardium, 407
- Methacholine**
 - vasodilators and vascular smooth muscle, 687
- Methanol**
 - intrarenal volumes and diffusion of alcohols, 343
- Methyldopa**
 - effect on plasma renin activity, 543
- Microcirculation**
 - measurement of radii and wall thickness of microvessels, 315
 - simulation of viscous behavior of whole blood using suspensions of flexible particles, 389
- Microscopy**
 - television
 - measurement of radii and wall thickness of microvessels, 315
- Microsomes**
 - mechanism of action of epinephrine and glucagon on canine heart, 429
 - structural and functional characterization of dog heart microsomes, 487
- Microvessels**
 - measurement of radii and wall thickness, 315
- Mitochondria**
 - calcium binding and uptake in cardiac muscle, 781
 - hyperthyroidism and, in rats, 171
 - structural and functional characterization of microsomes, 487
- Mitotic figures**
 - biochemical correlates of cardiac hypertrophy, changes in DNA content, 463
- Mitral stenosis**
 - pulmonary arterial pulse wave velocity and impedance, 637
- MJ-1999**
 - glycoside-induced bradycardia, 365
- Modeling of blood**
 - simulation of viscous behavior of whole blood using suspensions of flexible particles, 389
- Monoamine oxidase**
 - activity and thermosensitivity of canine cutaneous veins after inhibition of monoamine oxidase and catechol-o-methyl transferase, 607
- Mucopolysaccharide**
 - connective tissue and myocardial necrosis, 201
- Murexide method**
 - calcium binding and uptake in cardiac muscle, 781
- Muscles**
 - papillary
 - studies of myocardial asynchrony and regional hypoxia, 569
 - rate of calcium binding and uptake in normal animal and failing human cardiac muscle, 781
 - vascular smooth
 - effect of nicotine ester, acetylcholine, and other vasodilating agents on cutaneous and mesenteric vascular smooth muscle, 687
 - myogenic tone in isolated perfused vessels, 549

Myocardial infarction

- blood flow after, 161
- experimental, in dogs, 161
- glucagon and cardiac automaticity, 183

Myocardium

- asynchrony and regional hypoxia, 569
- connective tissue and myocardial necrosis, 201
- contractility
 - effects of hypoxia and metabolic inhibitors on intrinsic heart rate and, 53
 - mechanism of action of epinephrine and glucagon on canine heart, 429
 - response to norepinephrine, isoproterenol, and calcium chloride in hyperthyroid guinea pigs, 237
- proteins
 - inhibition of incorporation of leucine into myocardial proteins of rat by antiarrhythmic agents, 401
- release of adenosine by normal, and its relationship to regulation of coronary blood flow, 407

Myogenic tone

- in isolated perfused vessels; occurrence among vascular beds and along vascular trees, 549

N**Nagarse incubation**

- hyperthyroidism and heart mitochondria, 171

Natriuretics

- furosemide and renin secretion, 145

Necrosis

- connective tissue and myocardial necrosis, 201

Neomycin

- input-output analysis of cholesterol, 191

Nephrectomy

- hypertension and changes in cardiac output, 153

Nervous system

- autonomic
 - effect of vagus nerve stimulation on heart rate, 303
 - glycoside-induced bradycardia, 365
- central
 - autoregulation of total systemic circulation following destruction of, 379
- cholinergic innervation of autotransplanted canine kidney, 535
- inotropic responses of atria and ventricles to vagosympathetic stimulation in isovolumic canine heart, 265
- neural control of cerebral blood flow, 77
- sympathetic nerve stimulation
 - influence on ventricular function in newborn lambs, 417
 - modification by acetylcholine of response of rat mesenteric arteries to, 1
 - neural control of cerebral blood flow, 77

Nicotinate ester

- effect of acetylcholine and other vasodilating agents on cutaneous and mesenteric vascular smooth muscle, 687

Nicotine

- cardiovascular responses to mesenteric intra-arterial administration of, 713

Norepinephrine

- function of papillary muscle, 67
- inotropic response to hyperthyroidism, 237
- modification by acetylcholine of response of rat mesenteric arteries to sympathetic stimulation, 1
- potentiation of adrenergic venomotor responses in dogs by cardiac glycosides, 597

- turnover and synthesis in experimental hypertension in rats, 285

- vasodilators and vascular smooth muscle, 687

Nucleoside triphosphates

- calcium binding and uptake in cardiac muscle, 781

Nucleotides

- release of adenosine by normal myocardium, 407

O**Occlusions**

- bronchial
 - changes in pulmonary circulation after, 747
- measurement of cerebral hemispheric blood flow by intracarotid injection of hydrogen gas, 735
- myocardial blood flow after infarction, 161

Oscillations

- calcium and contractile recovery, 725
- mathematical analysis of oscillatory and non-oscillatory recovery of contractility and its modification by calcium, 725
- propagation of blood flow pulse in pulmonary circulation, 11

Ouabain

- bradycardia induced by glycosides, 365
- effects on insulin secretion in dogs, 119

Oxidative phosphorylation

- hyperthyroidism and heart mitochondria, 171

Oxygen

- consumption
 - autoregulation of total systemic circulation following destruction of central nervous system in dogs, 379
 - control of cerebral blood flow in sheep fetus and newborn lamb, 651
- decreased affinity of blood for oxygen in patients with low-output heart failure, 47
- dissociation curve, blood oxygen and heart failure, 47
- hyperbaric oxygenation
 - bradykinin production associated with oxygenation of fetal lamb, 521
- myocardial oxygen balance
 - release of adenosine by normal myocardium, 407

P**Pacing and pacemakers**

- atrioventricular
 - P-R interval and amplitude of first heart sounds, 255
- effect of vagus nerve stimulation on heart rate in dogs, 303
- inotropic responses to hyperthyroidism, 237
- pacemakers
 - effects of beta-receptor blockade on systemic and coronary hemodynamic response to increasing ventricular rate, 331
 - glucagon and cardiac automaticity, 183

Papillary muscle

- function in canine left ventricle, 67

Parasympathetic blockade

- cardiovascular reflexes from the abdomen, 713

Pathology

- abdominal and thoracic aortic structure, 677

Perfusion

- modification by acetylcholine of response of rat mesenteric arteries to sympathetic stimulation, 1
- pressure-flow relationships in coronary circulation, 293

- Pericardial fluid**
release of adenosine by normal myocardium, 407
- Peripheral resistance**
hypertension and changes in cardiac output, 153
- Peripheral vascular beds**
myogenic tone in isolated perfused vessels, 549
- Peripheral vascular response**
to simulated hemorrhagic shock during cardiopulmonary bypass in dogs, 107
- Phenylephrine**
inotropic response in hyperthyroidism, 237
- Phenyl-ethanolamine-N-methyl-transferase**
norepinephrine turnover in hypertension, 285
- Phosphate**
calcium binding and uptake in cardiac muscle, 781
- Phosphorylative capacity**
hyperthyroidism and heart mitochondria, 171
- Physiology**
heart and circulation of the African lungfish, 23
- Plasma**
renin activity
effect of methyldopa, 543
- Plethysmographs**
capacitance responses and fluid exchange in cat liver during stimulation of hepatic nerves, 277
propagation of blood flow pulse in pulmonary circulation, 11
- Polyploidy activity**
biochemical correlates of cardiac hypertrophy; changes in DNA content, 463
- Potassium**
effects of ouabain on insulin secretion, 119
- P-R interval**
effect of altering P-R interval on the amplitude of first heart sound in dogs, 255
- Preinfusion studies**
ventricular function curves in the exercising dog, 557
- Pressure**
arterial
hypertension and changes in cardiac output, 153
total systemic autoregulation, 379
capillary
autoregulation of total systemic circulation following destruction of central nervous system in dogs, 379
fluid mechanics of aortic valves, 693
inotropic responses to hyperthyroidism, 237
P-R interval and amplitude of first heart sounds, 255
See also Blood pressure
- Pressure-control**
effect of methyldopa on plasma renin activity, 543
- Pressure-flow relationships**
control of cerebral blood flow in sheep fetus and newborn lamb, 651
pulmonary arterial pulse wave velocity and impedance, 637
simulation of viscous behavior or whole blood using suspensions of flexible particles, 389
- Procaine amide**
inhibition of incorporation of leucine into myocardial proteins of rat by antiarrhythmic agents, 401
- Propranolol**
cardiac responses to sympathetic stimulation, 417
effects of beta-receptor blockade on systemic and coronary hemodynamic response to increasing ventricular rate, 331
effects of hypoxia and metabolic inhibitors on intrinsic heart rate and myocardial contractility, 53
glucagon and cardiac automaticity, 183
glycoside-induced bradycardia, 365
inhibition of incorporation of leucine into myocardial proteins by antiarrhythmic agents, 401
mechanism of action of epinephrine and glucagon on canine heart, 429
parasympathetic control of coronary blood flow, 509
ventricular function curves in the exercising dog; effects of rapid intravenous infusions and of propranolol, 557
- Prostheses**
fluid mechanics of aortic valves, 693
- Protein concentrations**
biochemical studies on hypertrophied heart, 245
inhibition of incorporation of leucine into myocardial proteins of rat by antiarrhythmic agents, 401
- Protopterus aethiopicus**
heart and circulation of African lungfish, 23
- Pseudorenin**
new angiotensin-forming enzyme, 451
- Pulmonary arteries**
blood flow pulse in, 11
pulse wave velocity and impedance in man, 637
- Pulmonary vascular resistance**
changes in pulmonary circulation after bronchial occlusion, 747
- Pulse**
propagation of blood flow pulse in pulmonary circulation, 11
pulmonary artery, 637
- Pumps and pumping**
ventricular function curves in the exercising dog; effects of rapid intravenous infusions and of propranolol, 557
- Pyrogallol**
catechol-o-methyl transferase inhibition with, 607

Q

- Quinidine**
inhibition of incorporation of leucine into myocardial proteins of rat by antiarrhythmic agents, 401

R

- Radioactive isotopes**
measurement of total and regional coronary blood flow in dogs, 581
- Radioactive microspheres**
total and regional coronary blood flow measured by, in conscious and anesthetized dogs, 581
- Reabsorption-replacement**
intrarenal hematocrit ratio, 669
- Red blood cells**
difference in geometry of young and old human erythrocytes explained by a filtering mechanism, 39
influence of deformability on blood viscosity, 131
simulation of viscous behavior of whole blood using suspensions of flexible particles, 389
- Rejection**
effects of saline loading in canine allotransplantation, 99
- Relaxation**
calcium and contractile recovery, 725
calcium binding and uptake in cardiac muscle, 781
studies of myocardial asynchrony and regional hypoxia, 569

- Renal blood flow**
countercurrent exchange of heat in dog kidney, 617
- Renal capillary pressure**
examination of intrarenal hematocrit ratio with technique of circulatory stop-flow in dogs, 669
- Renal denervation**
cholinergic innervation of the autotransplanted canine kidney, 535
- Renal venous blood**
intrarenal volumes and diffusion of alcohols, 343
- Renin**
effects of furosemide on secretion of, 145
effects of saline loading in canine renal allotransplantation, 99
plasma renin activity
 effect of methyldopa on, 543
pseudorenin, new angiotensin-forming enzyme, 451
- Resistance vessels**
myogenic tone in isolated perfused vessels, 549
- Respiratory system**
heart and circulation of African lungfish, 23
- Resting tension**
calcium and contractile recovery, 725
- Rheology**
deformability of red cells and blood viscosity, 131

S

- Salt loading**
effects of renin, erythropoietin, and blood pressure in canine renal allotransplantation, 99
hypertension and cardiac output changes, 153
- Sarcolemma**
mechanism of action of epinephrine and glucagon on canine heart, 429
- Sarcoplasmic reticulum**
calcium binding and uptake in cardiac muscle, 781
mechanism of action of epinephrine and glucagon on canine heart, 429
structural and functional characterization of dog heart microsomes, 487
- Shear rate**
deformability of red cells and blood viscosity, 131
- Shock**
peripheral vascular response, during cardiopulmonary bypass in dogs, 107
- Shunts, arteriovenous**
measurement of total and regional coronary blood flow in dogs, 581
- Simulation**
of blood flow, 389
- Sinoatrial arrest**
glucagon and cardiac automaticity, 183
- Sinoatrial node**
effect of vagus nerve stimulation on heart rate, 303
glycoside-induced bradycardia, 365
- Sinus**
fluid mechanics of aortic valves, 693
glycoside-induced bradycardia, 365
- Skin reactions**
vasodilators and vascular smooth muscle, 687
- Sodium**
effects of saline loading in canine allotransplantation, 99
furosemide and renin secretion, 145
vasodilators and vascular smooth muscle, 687
- Sounds, heart**
effect of altering P-R interval on the amplitude of the first heart sound in dogs, 255

- Spectrophotometric assay procedure**
calcium binding and uptake in cardiac muscle, 781
- Starling's law**
ventricular function curves in the exercising dog, 557
- Stasis**
simulation of viscous behavior of whole blood using suspensions of flexible particles, 389
- Static anisotropic elasticity**
aorta in living dogs, 765
- Stellate stimulation**
function of papillary muscle, 67
- Stenosis**
fluid mechanics of aortic valves, 693
- Stewart-Hamilton theorems**
input-output analysis of cholesterol, 191
- Stimulation**
capacitance responses and fluid exchange in cat liver during stimulation of hepatic nerves, 277
of sympathetic nerve
 influence on ventricular function in newborn lambs, 417
vagus nerve
 effect on heart rate, 303
 function of papillary muscle, 67
 inotropic responses of atria and ventricles in isovolumic canine heart, 265
 neural control of cerebral blood flow, 77
- Stouffer Prize (1969), 626**
- Structure and function**
abdominal and thoracic aortic structure, 677
- Sympathectomy**
inotropic responses of atria and ventricles to vagosympathetic stimulation in isovolumic canine heart, 265
neural control of cerebral blood flow, 77
- Sympathetic fibers**
cardiovascular responses to mesenteric intra-arterial administration of nicotine, cyanide and venous blood, 713

T

- Tachycardia**
inotropic responses to hyperthyroidism, 237
- Temperature**
cutaneous veins and local temperatures, 607
- Thermodilution technique**
countercurrent exchange of heat in dog kidney, 617
- Thoracic aortas**
comparison of abdominal and thoracic aortic medial structure in mammals, 677
- Thymidine pool**
cellular organization of growth during myocardial hypertrophy in rats, 473
- Thyrototoxicosis**
hyperthyroidism and heart mitochondria, 171
- Thyroxine**
inotropic responses to hyperthyroidism, 237
- Tissues**
blood flow in cutaneous tissue in man studied by washout of radioactive xenon, 215
blood oxygen and heart failure, 47
connective tissue and myocardial necrosis, 201
heart microsomes, 487
- Tracer decay curve**
input-output analysis of cholesterol, 191
- Transit time**
intrarenal hematocrit ratio with technique of circulatory stop-flow in dogs, 669

- Transmembrane potentials**
A-V nodal transmission, 439
- Transplantation**
effects of saline loading on renin, erythropoietin and blood pressure responses in canine allotransplantation, 99
- Tranlycypromaine**
cutaneous veins and local temperature, 607
- Trauma**
of injection
blood flow in cutaneous tissue, 215
- Triiodothyronine**
hyperthyroidism and heart mitochondria, 171
- Tritium**
inhibition of incorporation of leucine into myocardial proteins by antiarrhythmic agents, 401
- Turbulence**
fluid mechanics of aortic valves, 693
- Tyramine**
cardiac responses to sympathetic stimulation, 417
- Tyrosine**
norepinephrine turnover in hypertension, 285

U

- Umbilical cord occlusion**
control of cerebral blood flow in sheep fetus and newborn lamb, 651

V

- Vagal afferent fibers**
reflex bradycardia from digitalis, 705
- Vagal stimulation**
function of papillary muscle, 67
neural control of cerebral blood flow, 77
- Vagosympathetic trunks**
effect of vagus nerve stimulation on heart rate in dogs, 303
parasympathetic control of coronary blood flow in dogs, 509
- Vagotomy**
control of cerebral blood flow in sheep fetus and newborn lamb, 651
neural control of cerebral blood flow, 77
- Vagus nerve**
effect of stimulation on heart rate in dogs, 303
inotropic responses of atria and ventricles to vagosympathetic stimulation in isovolumic canine heart, 265
parasympathetic control of coronary blood flow in dogs, 509
- Vasa recta**
cholinergic innervation of the autotransplanted canine kidney, 535
- Vasa vasorum**
abdominal and thoracic aortic structure, 677
- Vascular bed**
pulmonary arterial pulse wave velocity and impedance, 637
- Vascular elasticity**
pulmonary arterial pulse wave velocity and impedance, 637
- Vascular smooth muscle**
effect of nicotinate ester, acetylcholine, and other vasodilating agents on cutaneous and mesenteric vascular smooth muscle, 687
release of adenosine by normal myocardium, 407

- Vasconstriction**
modification by acetylcholine of response of rat mesenteric arteries to sympathetic stimulation, 1
- Vasodilation**
coronary
myocardial blood flow after infarction, 161
- Vasodilator drugs**
changes in pulmonary circulation after bronchial occlusion, 747
effect of nicotinate ester, acetylcholine and other vasodilating agents on cutaneous and mesenteric vascular smooth muscle, 687
- Veins**
cutaneous
activity and thermosensitivity of canine cutaneous veins after inhibition of monoamine oxidase and catechol-O-methyl transferase, 607
potentiation of adrenergic venomotor responses in dogs by cardiac glycosides, 597
peripheral vascular response to shock, 107
- Velocity**
fluid mechanics of aortic valves, 693
- Ventilation-perfusion ratios**
changes in pulmonary circulation after bronchial occlusion, 747
- Ventricles**
function
curves in the exercising dog, effects of rapid intravenous infusions and of propranolol, 557
influence of sympathetic nerve stimulation on, 417
glucagon and cardiac automaticity, 183
inotropic responses to vagosympathetic stimulation in isovolumic canine heart, 265
performance
cardiovascular reflexes from the abdomen, 713
- Viscosity of blood**
fluid mechanics of aortic valves, 693
influence of deformability of red blood cells on, 131
- Vortex**
fluid mechanics of aortic valves, 693

W

- Wall thickness**
abdominal and thoracic aortic structure, 677
microvessels, measurement of radii and wall thickness, 315
- Water, tritiated**
intrarenal volumes and diffusion of alcohols, 343
- Water content**
biochemical studies on hypertrophied heart, 245

X

- Xenon**
control of cerebral blood flow in sheep fetus and newborn lamb, 651
measurements of cutaneous blood flow, 215
myocardial blood flow after infarction, 161
neural control of cerebral blood flow, 77

Y

- Yield stress**
simulation of viscous behavior of whole blood using suspensions of flexible particles, 389

Circulation Research

AN OFFICIAL JOURNAL OF THE AMERICAN HEART ASSOCIATION

VOLUME XXV

July-December
1969

AMERICAN HEART ASSOCIATION, INC.

Circulation Research

An Official Journal of the American Heart Association

Circulation Research provides a medium for bringing together basic research on the cardiovascular system from various disciplines including biology, biochemistry, biophysics, morphology, pathology, physiology and pharmacology. The Journal will also accept for publication manuscripts on clinical research that contribute to an understanding of fundamental problems.

Circulation Research

AN OFFICIAL JOURNAL OF THE AMERICAN HEART ASSOCIATION

Volume XXV

July-December

1969

No. 1 July

Modification by Acetylcholine of the Response of Rat Mesenteric Arteries to Sympathetic Stimulation. Kafait U. Malik and George M. Ling	1
Propagation of Blood Flow Pulse in the Normal Human Pulmonary Arterial System: Analysis of the Pulsatile Capillary Flow. Nicholas B. Karatzas and Grant de J. Lee	11
Heart and Circulation of the African Lungfish. Jan P. Szidon, Sukhamay Lahiri, Maurice Lev, and Alfred P. Fishman	23
Difference in Geometry of Young and Old Human Erythrocytes Explained by a Filtering Mechanism. Peter B. Canham	39
Decreased Affinity of Blood for Oxygen in Patients with Low-Output Heart Failure. James Metcalfe, Dharam S. Dhindsa, Miles J. Edwards, and Athanasios Mourdjinis	47
Effects of Hypoxia and Metabolic Inhibitors on the Intrinsic Heart Rate and Myocardial Contractility in Dogs. Anthony D. Jose and Frank Stitt	53
Function of the In-Situ Papillary Muscle in the Canine Left Ventricle. Robert Cronin, J. A. Armour, and Walter C. Randall	67
Observations on the Extrinsic Neural Control of Cerebral Blood Flow in the Baboon. I. M. James, R. A. Millar, and M. J. Purves	77
Classic Pages	10, 22, 46, 52, 76
Author Index	94
News from the American Heart Association	95

No. 2 August

Effects of Saline Loading on the Renin, Erythropoetin, and Blood Pressure Responses to Canine Renal Allotransplantation. Peter H. Abbrecht, Arthur J. Vander, and Jeremiah G. Turcotte	99
Peripheral Vascular Response to Simulated Hemorrhagic Shock during Cardiopulmonary Bypass in Dogs. David Longnecker and Francis L. Abel	107
Effects of Ouabain on Insulin Secretion in the Dog. L. Triner, J. Papaioanou, P. Killian, Y. Vulliemoz, R. Castany, and G. G. Nahas	119
Influence of Deformability of Human Red Cells upon Blood Viscosity. Holger Schmid-Schönbein, Roe Wells, and Jerry Goldstone	131
Mechanism of the Effects of Furosemide on Renin Secretion in Anesthetized Dogs. Arthur J. Vander and Joyce Carlson	145

(Continued)

Hypertension Caused by Salt Loading in the Dog: III. Onset Transients of Cardiac Output and Other Variables. Thomas G. Coleman and Arthur C. Guyton	153
Experimental Myocardial Infarction in the Dog: Comparison of Myocardial Blood Flow Within, Near, and Distant from the Infarct. J. Russell Rees and V. J. Redding	161
Heart Mitochondrial Function in Acute and in Chronic Hyperthyroidism in Rats. Dorothy A. Piatnek-Leunissen and Reinhard L. A. Leunissen ...	171
Glucagon: Its Enhancement of Atrioventricular Nodal Pacemaker Activity and Failure to Increase Ventricular Automaticity in Dogs. Benedict R. Lucchesi, David R. Stutz, and Robert A. Winfield	183
Input-Output Analysis for Total Input Rate and Total Traced Mass of Body Cholesterol in Man. William Perl and Paul Samuel	191
Myocardial Connective Tissue Metabolism in Response to Injury: Histological and Chemical Studies of Mucopolysaccharide and Collagen in Rat Hearts after Isoproterenol-Induced Infarction. Joseph T. Judd and Bernard C. Wexler	201
Blood Flow in Cutaneous Tissue in Man Studied by Washout of Radioactive Xenon. Per Seijrsen	215
Books Received	230
Classic Pages	106, 118, 130, 144, 182, 200
News from the American Heart Association	231
Author Index	235

No. 3 September

Myocardial Contractile Response to Norepinephrine, Isoproterenol, and Calcium Chloride in Hyperthyroid Guinea Pigs. M. Jay Goodkind ..	237
Hypertrophied Non-Failing Rat Heart: Partial Biochemical Characterization. Charles H. Dart, Jr., and John O. Holloszy	245
Effect of Altering P-R Interval on the Amplitude of the First Heart Sound in the Anesthetized Dog. Michael E. Stept, Charles E. Heid, James A. Shaver, Donald F. Leon, and James J. Leonard	255
Positive and Negative Inotropic Responses of the Atria and Ventricles to Vagosympathetic Stimulation in the Isovolumic Canine Heart. Donald V. Priola and Robert L. Fulton	265
Capacitance Responses and Fluid Exchange in the Cat Liver during Stimulation of the Hepatic Nerves. Clive V. Greenway, Ronald D. Stark, and W. Wayne Lutt	277
Turnover and Synthesis of Norepinephrine in Experimental Hypertension in Rats. Jacques de Champlain, Robert A. Mueller, and Julius Axelrod	285
Pressure-Flow Relationships in the Coronary Circulation. Wadie M. Fam and Maurice McGregor	293
Paradoxical Effect of Vagus Nerve Stimulation on Heart Rate in Dogs. Matthew N. Levy, Paul J. Martin, Thelma Iano, and Harrison Zieske ..	303

(Continued)

Simultaneous Measurements of Radii and Wall Thickness of Microvessels in the Anesthetized Rat. Silvio Baez	315
Effects of Beta-Receptor Blockade on the Systemic and Coronary Hemodynamic Response to an Increasing Ventricular Rate in the Unanesthetized Dog. Fred R. Cobb, Robert J. Bache, Paul A. Ebert, Judith C. Rembert, and Joseph C. Greenfield, Jr.	331
Intrarenal Volumes of Distribution and Relative Diffusion Coefficients of Monohydric Alcohols. Francis P. Chinard, Colette N. Thaw, Anne C. Delea, and William Perl	343
Classic Pages	254, 264, 276, 292, 302, 330, 342
Author Index	358
News from the American Heart Association	359

No. 4 October

Chronotropic Effect of Cardiac Glycosides in Cats, Dogs, and Rabbits. Robert E. Ten Eick and Brian F. Hoffman	365
Autoregulation of the Total Systemic Circulation Following Destruction of the Central Nervous System in the Dog. Harris J. Granger and Arthur C. Guyton	379
Engineering Simulation of the Viscous Behavior of Whole Blood Using Suspensions of Flexible Particles. E. Glenn Tickner and Alvin H. Sacks	389
Inhibition of Incorporation of Leucine into Myocardial Proteins of the Rat by Antiarrhythmic Agents. Barry M. Beller and Stephen Mongillo	401
Release of Adenosine by the Normal Myocardium in Dogs and Its Relationship to the Regulation of Coronary Resistance. Rafael Rubio and Robert M. Berne	407
Influence of Sympathetic Nerve Stimulation on Ventricular Function in the Newborn Lamb. S. Evans Downing, Norman S. Talner, Alexander G. M. Campbell, Katherine H. Halloran, and Howard B. Wax	417
Mechanism of Action of Epinephrine and Glucagon on the Canine Heart: Evidence for Increase in Sarcotubular Calcium Stores Mediated by Cyclic 3',5'-AMP. Mark L. Entman, Gerald S. Levey, and Stephen E. Epstein	429
Influence of the Direction of the Atrial Wave Front on A-V Nodal Transmission in Isolated Hearts of Rabbits. Michiel J. Janse	439
Pseudorenin: A New Angiotensin-Forming Enzyme. Leonard T. Skeggs, Kenneth E. Lentz, Joseph R. Kahn, Frederic E. Dorer, and Melvin Levine	451
Biochemical Correlates of Cardiac Hypertrophy: III. Changes in DNA Content; the Relative Contributions of Polyploidy and Mitotic Activity. David Grove, K. G. Nair, and Radovan Zak	463
Biochemical Correlates of Cardiac Hypertrophy: IV. Observations on the Cellular Organization of Growth during Myocardial Hypertrophy in the Rat. D. Grove, R. Zak, K. G. Nair, and V. Aschenbrenner	473
Structural and Functional Characterization of Dog Heart Microsomes. Petrus J. Pretorius, W. Gerhard Pohl, Charles S. Smithen, and Giuseppe Inesi	487

(Continued)

Answers to a Congressman's Questions: An Editorial.	
Julius H. Comroe, Jr.	501
Classic Pages	416, 450, 472, 486, 500
Author Index	504
News from the American Heart Association	505

No. 5 November

Parasympathetic Control of Coronary Blood Flow in Dogs. Eric O. Feigl	509
Bradykinin Production Associated with Oxygenation of the Fetal Lamb. Michael A. Heymann, Abraham M. Rudolph, Alan S. Nies, and Kenneth L. Melmon	521
Cholinergic Innervation of the Autotransplanted Canine Kidney. Howard A. Weitsen and John E. Norvell	535
Effect of Methyldopa on Plasma Renin Activity in Man. Shakil Mohammed, Alfred F. Fasola, Philip J. Privitera, Raymond J. Lipicky, B. L. Martz, and Thomas E. Gaffney	543
Myogenic Tone in Isolated Perfused Vessels: Occurrence among Vascu- lar Beds and along Vascular Trees. Eiichi Uchida and David F. Bohr ..	549
Ventricular Function Curves in the Exercising Dog: Effects of Rapid Intravenous Infusions and of Propranolol. Jonathan Keroes, Roger R. Ecker, and Elliot Rapaport	557
In-Vitro Studies of Myocardial Asynchrony and Regional Hypoxia. John V. Tyberg, William W. Parmley, and Edmund H. Sonnenblick	569
Total and Regional Coronary Blood Flow Measured by Radioactive Microspheres in Conscious and Anesthetized Dogs. Raul J. Domenech, Julien I. E. Hoffman, Mark I. M. Noble, Kenneth B. Saunders, James R. Henson, and Sujanto Subijanto	581
Potentialiation of Adrenergic Venomotor Responses in Dogs by Cardiac Glycosides. David Brender, Paul M. Vanhoutte, and John T. Shepherd	597
Activity and Thermosensitivity of Canine Cutaneous Veins after Inhibi- tion of Monoamine Oxidase and Catechol-O-Methyl Transferase. Paul M. Vanhoutte and John T. Shepherd	607
Countercurrent Exchange of Heat in the Dog Kidney. Asbjörn Röed and Knut Aukland	617
The 1969 Stouffer Prize	626
Classic Pages	520, 542, 556, 568, 580, 627, 628, 629, 630
News from the American Heart Association	631
Author Index	636

No. 6 December

Pulmonary Arterial Pulse Wave Velocity and Impedance in Man. William R. Milnor, C. Richard Conti, Kenneth B. Lewis, and Michael F. O'Rourke	637
--	-----

(Continued)

Observations on the Control of Cerebral Blood Flow in the Sheep Fetus and the Newborn Lamb. M. J. Purves and I. M. James	651
Examination of the Intrarenal Hematocrit Ratio with the Technique of Circulatory Stop-Flow in Dogs. Ewald E. Selkurt and Richard J. Laurence	669
Comparison of Abdominal and Thoracic Aortic Medial Structure in Mammals: Deviation of Man from the Usual Pattern. Harvey Wolinsky and Seymour Glagov	677
Effect of Nicotinate Ester, Acetylcholine, and Other Vasodilating Agents on Cutaneous and Mesenteric Vascular Smooth Muscle. R. K. Winkelmann, W. Mitchell Sams, Jr., and David F. Bohr	687
Fluid Mechanics of Model Normal and Stenosed Aortic Valves. Brian Bellhouse and Francis Bellhouse	693
Reflex Cardiovascular Effects of Epicardial Stimulation by Acetyl-strophanthidin in Dogs. Peter Sleight, Amrit Lall, and Martin Muers	705
Cardiovascular Responses of the Cat to Mesenteric Intra-Arterial Administration of Nicotine, Cyanide and Venous Blood. Robin Saphir and Elliot Rapaport	713
Mathematical Analysis of Oscillatory and Non-oscillatory Recovery of Contractility after a Rested-State Contraction and Its Modification by Calcium. Christian J. Posner and David A. Berman	725
Measurement of Cerebral Hemispheric Blood Flow by Intracarotid Injection of Hydrogen Gas: Validation of the Method in the Monkey. Yukito Shinohara, John S. Meyer, Akira Kitamura, Masanaru Toyoda, and Tisuke Ryu	735
Changes in the Pulmonary Circulation after Bronchial Occlusion in Anesthetized Dogs and Cats. Gwenda R. Barer, Peter Howard, Janice R. McCurrie, and John W. Shaw	747
Static Anisotropic Elastic Properties of the Aorta in Living Dogs. Dali J. Patel, Joseph S. Janicki, and Thomas E. Carew	765
Rate of Calcium Binding and Uptake in Normal Animal and Failing Human Cardiac Muscle: Membrane Vesicles (Relaxing System) and Mitochondria. Shoichi Harigaya and Arnold Schwartz	781
Corrections	780

Volumes XXIV and XXV
January-December
1969

I. HYPERTENSION—VOL. XVII: EXPERIMENTAL HYPERTENSION (May, 1969)

Quantitative Analysis of the Pathophysiology of Hypertension Arthur C. Guyton, and Thomas G. Coleman	I-1
Humoral Transmission of Hypertension: Evidence from Parabiosis L. K. Dahl, K. D. Knudsen, and J. Iwai	I-21
Adrenal Cortical Dysfunction as a Basis for Experimental Hypertensive Disease Floyd R. Skelton, Alexander C. Brownie, Peter A. Nickerson, Agostino Molteni, Samuel Gallant, and Howard D. Colby	I-35
Effects of Generalized Changes in Plasma Electrolyte Concentration and Osmolarity on Blood Pressure in the Anesthetized Dog Francis J. Haddy, Jerry B. Scott, Thomas E. Emerson, Jr., Henry W. Overbeck, and Robert M. Daugherty, Jr.	I-59
Interrelationships of Sodium Intake, Hypertension, and Norepinephrine Storage in the Rat Jacques de Champlain, Lawrence Krakoff, and Julius Axelrod	I-75
Studies on the Spontaneously Hypertensive Rat: Genealogy, Effects of Varying Salt Intake, and Kinetics of Catecholamine Metabolism William J. Louis, Ryo Tabei, Sydney Spector, and Albert Sjoerdsma ..	I-93
Control of Renin Release in Experimental Hypertension Carlos R. Ayers, Robert H. Harris, Jr., and Lewis G. Lefer	I-103
Renin Secretion in the Patient with Hypertension: Relationship to Intra-renal Blood Flow Distribution Norman K. Hollenberg, Murray Epstein, Richard I. Basch, John P. Merrill, and Roger B. Hickler	I-113
The Prostaglandins: Biologically Active Lipids with Implications in Circulatory Physiology James R. Weeks	I-123
Physiological and Pathological Variations of Plasma Angiotensin II in Man: Correlation with Renin Activity and Sodium Balance David J. Gocke, Joan Gerten, Louis M. Sherwood, and John H. Laragh	I-131

II. THE MYOCARDIUM IN HYPERFUNCTION: HYPERTROPHY AND HEART FAILURE (July, 1969)

Introduction	II-1
1 Contractile Function of the Heart in Hyperfunction, Hypertrophy and Heart Failure	II-9
A. Contractile proteins of the myocardium and the mechanisms of muscle contraction	II-9
B. Contractile function of the heart	II-13

(Continued)

C.	Force and velocity of cardiac muscle contraction	II-25
D.	Frank-Starling mechanism and inotropism	II-28
E.	Contractile activity of the heart in isometric and isotonic CHH	II-31
F.	Functional significance of hypertrophy and the contractile function of the hypertrophied myocardium	II-35
G.	Contractile function of the myocardium in heart failure	II-45
2	Transformation of Energy in the Myocardium in Hyperfunction, Hypertrophy and Heart Failure	II-55
A.	Energy transformation in the normal heart	II-55
B.	Myocardial oxygen consumption and the intensity of oxidative processes in hyperfunction, hypertrophy and heart failure	II-65
C.	Glycolysis and oxidative phosphorylation in hyperfunction, hypertrophy, and heart failure	II-70
3	Dynamics of Nucleic Acid and Protein Synthesis in the Myocardium in Hyperfunction and Hypertrophy	II-82
A.	Metabolism of nucleic acids and proteins and their role in the contractile function of the normal heart	II-82
B.	Nucleic acid and protein synthesis in CHH	II-88
C.	Interaction of the genetic apparatus and physiologic function of cells as the fundamental mechanism of myocardial hypertrophy	II-94
4	Replication, Transcription and Translation in the Myocardium in Compensatory Hyperfunction and Heart Failure	II-100
A.	Replication	II-100
B.	Transcription	II-106
C.	Translation	II-111
5	Structural Proteins and Myocardial Structure in Hyperfunction, Hypertrophy and Heart Failure	II-115
A.	Changes in the qualitative distribution of myocardial proteins and myosin ATPase activity in CHH	II-115
B.	Morphologic changes in the myocardium in hyperfunction, hypertrophy and heart failure	II-123
C.	Morphologic changes in autonomic innervation of the heart in CHH	II-134
D.	The complex exhaustion and failure of the hypertrophied heart	II-141
E.	The role of neuroendocrine regulation in the development of hypertrophy and heart failure	II-143
6	The Effect of Co-Factors of Protein Synthesis and Nucleic Acid Precursors on the Development of Cardiac Hyperfunction and Failure	II-146
	Bibliography	II-156
III.	REGISTRY OF U. S. NEPHROLOGY TRAINING CENTERS (September, 1969)	

Supplements to Circulation Research

No. 1—Hypertension Vol. XVII

No. 2—The Myocardium

No. 3—Registry of U.S. Nephrology Training Centers (*by title only*)

Circulation Research

SUPPLEMENT SUBJECT INDEX

VOLUMES XXIV AND XXV

JANUARY-DECEMBER, 1969

A

- Acetylcholine**
 - control of renin release in experimental hypertension, I-103
- Acidosis**
 - effects on blood pressure, I-59
- Adenoma**
 - adrenal cortical dysfunction, I-35
- Adenyl cyclase**
 - prostaglandins, I-123
- Adrenal cortical dysfunction**
 - basis for experimental hypertensive disease, I-35
- Aldosterone**
 - adrenal cortical dysfunction as basis for experimental hypertensive disease, I-35
 - control of renin release in experimental hypertension, I-103
- Alkalosis**
 - effects of changes in electrolyte concentration and osmolarity on blood pressure, I-59
- Angiography**
 - renin secretion in hypertension, I-113
- Angiotensin**
 - effect of angiotensin released by one kidney on function of second kidney, I-1
- Angiotensin II**
 - bioassay, I-131
 - clinical observations, I-131
 - correlation with renin activity and sodium balance, I-131
 - iodination, I-131
 - physiological and pathological variations in man, I-131
 - purification, I-131
- Animals**
 - dogs**
 - control of renin release in experimental hypertension, I-103
 - affects on generalized changes in plasma electrolyte concentration and osmolarity on blood pressure, I-59
 - rats**
 - adrenal cortical dysfunction as basis for experimental hypertensive disease, I-35
 - humoral transmission of hypertension, I-21
 - interrelationships of sodium intake, hypertension and norepinephrine storage in rats, I-75
 - spontaneously hypertensive rats, I-83
- Antibodies**
 - angiotensin, I-131
- Aortography**
 - renin secretion in hypertension, I-113
- Arterial pressure**
 - analysis of effects on hypertension, I-1
- ATPase (adenosine triphosphate), II-3**
 - changes in qualitative distribution of myocardial proteins and myosin ATPase activity in compensatory hyperfunction, II-115
 - of myosin, II-9
 - prostaglandins, I-123
- Autonomic reflexes**
 - effect on arterial pressure regulation, I-1
- Autoregulation**
 - hypertension and, I-1

S-VI

B

- Bibliography (myocardium), II-156**
 - publications in Russian, II-156
- Bioassay**
 - angiotensin II, I-131
- Biochemical studies**
 - adrenal cortical dysfunction as basis for experimental hypertensive disease, I-35
- Blood flow**
 - effects of generalized changes in plasma electrolyte concentration and osmolarity on blood pressure in dogs, I-59
 - renal artery pressure and blood flow, I-103
 - renin secretion in hypertension, I-113
- Blood pressure**
 - adrenal cortical dysfunction, I-35
 - effects of ganglionic blockade on blood pressure and norepinephrine storage, I-75
 - effects on generalized changes in plasma electrolyte concentration and osmolarity on blood pressure in dogs, I-59
 - effects of treatment with DOCA and sodium on, I-75
 - humoral transmission of hypertension, I-21
 - interrelationships of sodium intake, hypertension and norepinephrine storage in rats, I-75
- Body fluid volumes**
 - hypertensions and, I-1
 - variations of plasma angiotensin II, I-131

C

- Catecholamines**
 - reactions to activate glycolysis in myocardial cell, II-56
 - spontaneously hypertensive rats, I-93
- Cations**
 - response of blood pressure, I-59
- Cells**
 - myocardium**
 - interaction of genetic apparatus and physiological function of cells as fundamental mechanism of myocardial hypertrophy, II-94
 - reactions to activate glycolysis in, II-56
 - replication, transcription, and translation in myocardium in compensatory hypertension and heart failure, II-100
- Cirrhosis with ascites**
 - plasma renin and angiotensin, I-131
- Compensatory hyperfunction of heart (CHH), II-2**
 - contractile activity of heart in isometric and isotonic, II-31
 - effect of cofactors on protein synthesis and nucleic acid precursors on development of hyperfunction and heart failure, II-146
 - morphological changes in autonomic innervation of heart in, II-134
 - nucleic acid and protein synthesis, II-86
 - replication, transcription, and translation in myocardium in compensatory hypertension and heart failure, II-100
 - stages of, II-6
 - progressing cardiosclerosis and gradual exhaustion, II-7

- relatively stable state of hyperfunction, II-6
- stage of damage, II-6
- structural proteins and myocardial structure, II-115
- Computer analysis**
 - pathophysiology of hypertension, I-1
- Conjugation**
 - in myocardium, II-2
- Conn's syndrome**
 - adrenal cortical dysfunction, I-35
- Contractility**
 - contractile function of heart, II-13
 - contractile proteins of myocardium, II-9
 - force and velocity of cardiac muscle contraction, II-25
 - Frank-Starling mechanism and inotropism, II-28
 - function in heart failure, II-45
 - functional significance of hypertrophy, II-35
 - mechanisms of muscle contraction, II-9
 - metabolism of nucleic acids and proteins and their role in contractile function, II-82
 - myocardial, II-3, II-9
- Cushing's syndrome**
 - adrenal cortical dysfunction, I-35
- Cyclic 3',5'-AMP**
 - prostaglandins, I-123

D

- Diuretics**
 - hypovolemic diuretic studies, I-59
 - isovolemic diuretic studies, I-59
- DNA (deoxyribonucleic acid)**
 - changes in RNA and DNA content in rabbit cardiac muscle as function of age, II-83
 - replication, transcription, and translation in myocardium in compensatory hypertension and heart failure, II-100
- DOCA (desoxycorticosterone)**
 - effect of treatment of sodium and, on blood pressure, I-75
- Dopamine**
 - renin release in experimental hypertension, I-103

E

- Electrolyte abnormalities**
 - effects of generalized changes in plasma electrolyte concentration and osmolarity on blood pressure in dogs, I-59
- Energy transformation**
 - in hyperfunction, hypertrophy, and heart failure, II-55
 - myocardium II-3
 - in normal heart, II-55
- Excitation-contraction coupling, II-3**
 - processes in myocardium, II-2, II-3

F

- Force and velocity**
 - of cardiac muscle contraction, II-25
- Frank-Starling mechanism, II-28**
- Furosemide**
 - effects on blood pressure, I-59

G

- Ganglia**
 - morphological changes in autonomic innervation of heart in compensatory hyperfunction, II-134

- Ganglionic blockade**
 - effects on blood pressure and norepinephrine storage, I-75
- Genetic apparatus**
 - interaction of genetic apparatus and physiological function of cells as fundamental mechanism of myocardial hypertrophy, II-94
 - replication, transcription, and translation in myocardium in compensatory hypertension and heart failure, II-100
 - studies on spontaneously hypertensive rats, I-93
- Glomerulonephritis**
 - renin secretion in hypertension, I-113
- Glycolysis, II-56**
 - in hyperfunction, hypertrophy, and heart failure, II-70

H

- Heart failure**
 - contractile function of heart, II-9, II-45
 - effect of cofactors of protein synthesis and nucleic acid precursors on development of hyperfunction and heart failure, II-146
 - energy transformation in myocardium, II-55
 - glycolysis and oxidative phosphorylation, II-70
 - manifestations characterizing most types of, II-53
 - morphological changes in myocardium, II-123
 - oxygen consumption in, II-65
 - replication, transcription, and translation in myocardium in compensatory hypertension and, II-100
 - role of neuroendocrine regulation in development of hypertrophy and heart failure, II-141
 - structural proteins and myocardial structure, II-115
- Homeostasis**
 - adrenal cortical dysfunction, I-35
- Hormones**
 - adrenocortical
 - in hypertension, I-35
- Humoral transmission**
 - of hypertension, I-21
- Hydralazine**
 - control of renin release in experimental hypertension, I-103
- Hypercalcemia**
 - effects of changes in electrolyte concentration and osmolarity on blood pressure, I-59
- Hyperfunction**
 - changes in qualitative distribution of myocardial proteins and myosin ATPase activity in compensatory hyperfunction, II-115
 - contractile function of heart, II-9
 - dynamics of nucleic acid and protein synthesis in myocardium in, II-82
 - effect of cofactors of protein synthesis and nucleic acid precursors on development of hyperfunction and heart failure, II-146
 - energy transformation in myocardium, II-55
 - glycolysis and oxidative phosphorylation, II-70
 - morphological changes in autonomic innervation of heart in, II-134
 - morphological changes in myocardium, II-123
 - oxygen consumption in, II-65
 - structural proteins and myocardial structure, II-115
- Hyperkalemia**
 - effects on blood pressure, I-59
 - resistance to blood flow, I-59
- Hypermagnesemia**
 - effects of changes in electrolyte concentration and osmolarity on blood pressure, I-59
- Hyperosmolarity**
 - effects on blood pressure, I-59

Hyperplasia

- adrenal cortical dysfunction, I-35
- juxtaglomerular cell, plasma renin and angiotensin, I-131

Hypertension

- adrenal-regeneration, I-35
- androgen-induced, I-35
- arterial pressure control systems, I-1
- changes in fluid volume, I-1
- phenomenon of autoregulation, I-1
- compensatory
 - replication, transcription and translation in myocardium in heart failure and, II-100
- effects of generalized changes in plasma electrolyte concentration and osmolality on blood pressure in dogs, I-59
- essential
 - interrelationships of sodium intake, norepinephrine storage and, I-75
- etiology, I-75
- experimental
 - adrenal cortical dysfunction as basis for, I-35
 - control of renin release in, I-103
 - desoxycorticosterone and saline, I-75
 - interrelationships of sodium intake, hypertension and norepinephrine storage in rats, I-75
 - studies on spontaneously hypertensive rats, I-93
- Goldblatt
 - analysis of different theories for the cause of, I-1
- humoral transmission of: evidence from parabiosis, I-21
- interrelationships of sodium intake, norepinephrine storage and hypertension in rats, I-75
- malignant, I-1
 - plasma renin and angiotensin, I-131
- methylandrostenediol (MAD), I-35
- methyltestosterone (MT), I-35
- metopirone, I-35
- nephrology training centers registry, III-5
- onset of reduced storage of norepinephrine in hypertension, I-75
- pathogenesis
 - adrenal cortical dysfunction, I-35
- prostaglandins, I-123
- renal
 - humoral transmission of hypertension, I-21
 - renin secretion, relationship to intrarenal blood flow distribution, I-113
- spontaneously hypertensive rats, I-93
 - effects of varying salt intake, I-93
 - genealogy, I-93
 - kinetics of catecholamine metabolism, I-93
 - testosterone, I-35

Hypertrophy

- complex of exhaustion and failure of hypertrophied heart, II-141
- contractile function of heart, II-9, II-35
- dynamics of nucleic acid and protein synthesis in myocardium, II-82
- energy transformation in myocardium, II-55
- functional significance of, II-35
- glycolysis and oxidative phosphorylation, II-70
- interaction of genetic apparatus and physiological function of cells as fundamental mechanism of, II-94
- morphological changes in myocardium, II-123
- oxygen consumption in, II-65
- role of neuroendocrine regulation in development of hypertrophy and heart failure, II-141
- structural proteins and myocardial structure, II-115

Hypervolemic studies

- blood pressure responses, I-59

Hypocalcemia

- effects of changes in electrolyte concentration and osmolality on blood pressure, I-59

Hypokalemia

- changes in electrolyte concentration and osmolality on blood pressure, I-59

Hypotension

- adrenal cortical dysfunction, I-35

I**Immunoassay**

- Angiotensin, II, I-131

Inotropism

- contractile activity of heart in, II-28

Isoproterenol

- control of renin release in experimental hypertension, I-103

Isovolemic studies

- of blood pressure responses, I-59

K**Kidneys**

- prostaglandins, I-123
- renin secretion in hypertension, I-113

Krebs cycle, II-59

- direct transformation of amino acids into, II-59

L**Lipids**

- prostaglandins, I-123

Load on the heart

- hypertension and, I-1

M**Meerson, F. Z., II-1****Methylandrostenediol hypertension (MAD), I-35****Metopirone hypertension, I-35****Morphological studies**

- adrenal cortical dysfunction as basis for experimental hypertension, I-35
- adrenal-regeneration hypertension, I-35
- changes in myocardium in hyperfunction, hypertrophy, and heart failure, II-123
- morphological changes in autonomic innervation of heart in compensatory hyperfunction, II-134

Myocardium**cells**

- dynamics of nucleic acid and protein synthesis in myocardium in hyperfunction and hypertrophy, II-83
- interaction of genetic apparatus and physiological function of cells as fundamental mechanism of myocardial hypertrophy, II-94
- contraction, process, II-3
 - alterations in plasma ionic composition, I-59
- energy production, process of, II-3
- energy transformation, II-55
 - in normal heart, II-55
- excitation, process of, II-2, II-3
- fundamental processes, II-2
- genetic apparatus, II-2, II-3
 - interaction with physiological function of cells as fundamental mechanism of myocardial hypertrophy, II-94
- hyperfunction; see Hyperfunction

- hypertrophy; *see* Hypertrophy
- Miokard (The Myocardium)* by F. Z. Meerson, II-1
- oxygen consumption
 - in hyperfunction, hypertrophy, and heart failure, II-65
- protein synthesis, II-3, II-82
- Myosin**, II-9
 - changes in qualitative distribution of myocardial proteins and myosin ATPase activity in compensatory hyperfunction, II-115

N

- Nephrectomy**
 - unilateral, control of renin release in experimental hypertension, I-103
- Nephrology**
 - training centers registry, III-5
- Nerves**
 - morphological changes in autonomic innervation of heart in compensatory hyperfunction, II-134
- Neuroendocrine regulation**
 - role in development of hypertrophy and heart failure, II-141
- Nitroprusside**
 - control of renin release in experimental hypertension, I-103
- Norepinephrine**
 - effects of ganglionic blockade on blood pressure and norepinephrine storage, I-75
 - influence of sodium on turnover of, I-75
 - interrelationships of sodium intake, hypertension and norepinephrine storage in rats, I-75
 - kinetics of norepinephrine turnover in spontaneously hypertensive rats, I-93
 - metabolism of, I-75
 - onset of reduced storage of norepinephrine in hypertension, I-75
 - subcellular distribution, I-75
 - turnover and synthesis rate, I-75
 - uptake and storage in hypertensive rats, I-75
- Nucleic acid**
 - in compensatory hypertrophic heart, II-86
 - dynamics of nucleic acid and protein synthesis in myocardium in hyperfunction and hypertrophy, II-82
 - effect of cofactors of protein synthesis and nucleic acid precursors on development of hyperfunction and heart failure, II-146
 - metabolism, in contractile function of normal heart, II-82

O

- Osmolarity**
 - effects of generalized changes in plasma electrolyte concentration and osmolarity on blood pressure in dogs, I-59
- Oxidative phosphorylation**
 - in hyperfunction, hypertrophy, and heart failure, II-70
- Oxygen consumption**
 - in hyperfunction, hypertrophy, and heart failure, II-65

P

- Parabiosis**
 - humoral transmission of hypertension, I-21
- Pathophysiology**
 - of hypertension, I-1

Circulation Research, Vol. XXV, December 1969

- Peripheral vascular beds**
 - effects of generalized changes in plasma electrolyte concentration and osmolarity on blood pressure in dogs, I-59
- Phospholipid renin inhibitor**, I-123
- Physiology**
 - prostaglandins, I-123
- Plasma**
 - angiotension II, correlation with renin activity and sodium balance, I-131
 - effects of generalized changes in electrolyte concentration and osmolarity on blood pressure in dogs, I-59
 - renin activity
 - control of renin release in experimental hypertension, I-103
- Prostaglandins**
 - biologically active lipids with implications in circulatory physiology, I-123
 - cardiovascular pharmacology, I-123
 - chemical structure and origin, I-123
 - human pathology, I-123
 - physiological role, I-123
 - renal pharmacology, I-123
- Protein synthesis**
 - changes in qualitative distribution of myocardial proteins and myosin ATPase activity in compensatory hyperfunction, II-115
 - in compensatory hypertrophic heart, II-86
 - dynamics of nucleic acid and protein synthesis in myocardium in hyperfunction and hypertrophy, II-82
 - effect of cofactors of protein synthesis and nucleic acid precursors on development of cardiac hyperfunction and heart failure, II-146
 - metabolism of nucleic acids and proteins and their role in contractile function, II-82
 - myocardium, II-3
 - replication, transcription, and translation in myocardium in compensatory hypertension and heart failure, II-100
- Pyelonephritis**
 - renin secretion in hypertension, I-113

R

- Radioimmunoassay**
 - variations of plasma angiotensin II, I-131
- Registries**
 - Nephrology training centers, III-5
- Renal artery**
 - control of renin release in experimental hypertension, I-103
 - hypertension, I-103
 - humoral transmission of, I-21
 - renin secretion
 - relationship to intrarenal blood flow distribution, I-113
 - stenosis
 - plasma renin and angiotensin, I-131
 - renin secretion in hypertension, I-113
- Renal cortical ischemia**
 - renin secretion in hypertension, I-113
- Renal diseases**
 - nephrology training centers registry, III-5
- Renin**
 - activity, physiological and pathological variations of plasma angiotensin II, I-131
 - control of renin release in experimental hypertension, I-103
 - secretion in patients with hypertension, relationship to intrarenal blood flow distribution, I-113

Renin-angiotensin-aldosterone system

hypertension and, I-1

Renin-angiotensin system

renin secretion in hypertension, I-113

variations of plasma angiotensin II, I-131

Replication

transcription, translation, and replication in myocardium in compensatory hypertension and heart failure, II-100

Research

nephrology training centers registry, III-5

Reserpine

control of renin release in experimental hypertension, I-103

RNA (ribonucleic acid)

changes in RNA and DNA content in rabbit cardiac muscle as function of age, II-83

replication, transcription, and translation in myocardium in compensatory hypertension and heart failure, II-100

S**Sodium**

balance

physiological and pathological variations of plasma angiotensin, II, I-131

effects of varying salt intake

spontaneously hypertensive rats, I-93

humoral transmission of hypertension: evidence from parabiosis, I-21

interrelationships of sodium intake, hypertension and norepinephrine storage in rats, I-75

T**Testosterone**

hypertension, I-35

Training centers

in nephrology, III-5

Transcription

replication, transcription and translation in myocardium in compensatory hypertension and heart failure, II-100

Transketolase activity

change in compensatory hyperfunction of heart, II-110

Translation

replication, transcription, and translation in myocardium in compensatory hypertension and heart failure, II-100

Trimethaphan

control of renin release in experimental hypertension, I-103

V**Vasoconstrictor agents**

hypertension and, I-1

Vasodilator drugs

control of renin release in experimental hypertension, I-103

prostaglandins, I-123

Vasopressin

prostaglandins, I-123

Vitamin B₁₂

effect of cofactors of protein synthesis and nucleic acid precursors on development of cardiac hyperfunction and heart failure, II-146
